SPIN THE BLOCK

Δ° ❁ laserhawk

Introduction:
Let me start off by saying I don't know shit about guns personally. I'm probably too crazy to own one. That's why I have seven watt blinding laser pointers. I lurk on /pol/, /k/, do a lot of reading and over the years, I have heard a lot of shit that I can not even remotely prove. Even on the darknet's Hidden Answers, before Opal shut down the site, people like Mr. Black, VoH20 and others with military or law enforcement histories and experience would discuss things they know. I have watched a lot of DemolitionRanch, GY6, Hickok45, Sootch00, Iraqveteran8888 as well as other videos throughout the years. From my online interactions and online research, I was able to understand a lot about guns, despite never having access to one. I can say with confidence that my research is ironclad and that my contextual understanding is extensive enough that this manual is accurate or close to accurate.

If you read this compiled text document (or book), you will become exponentially well informed. I want to help you get your Master's Degree In Block Spinning, Drilling, and Opposition Catching. If you are the willing student, verily, I am the eager teacher. This section was originally a part of my text file, The Known Vulnerabilities Of The United States Of America. This text file was and is mostly too racial, political and not something that a street dude will be willing to read or something they can read without being lost. It will also be something they would be offended by. The average street dude is impatient and ignorant (not stupid, not dumb, ignorant. If you don't know, you don't know). You will never see a hardcore gangbanger on 4chan.org/k/, trying to learn about guns. Niggas do not plan shit. I was shocked to see Gangster Disciples on TikTok and I respected that these brothers are about real growth.

To avoid offending the readers and to avoid confusion, I have decided to tone down the rhetoric for this so the most people can understand and utilize the information, especially the target demographic this book was written for - the street dudes. No matter your race or wealth or class, if you bang, if you slang, if you pimp, if you blick - You can and will benefit from this book. If you are BD, you will benefit from this book. If you are GD, you will benefit from this book. If you are Bloods, Crips, Latin Kings, Vice Lords, Nortenos, Surenos, YMM, Black P. Stones, Mickey Cobras, Woo, Choo, MS-13, PEN1, Aryan Brotherhood, Inland Empire, Insane BD or GD, Dead Man Inc, Los Zetas, CJNG, Sinaloa, Hmong. If doesn't matter what you are. Real recognizes real. Bang what you bang. Whatever clique you claim, rep it hard and put in work. You may be wondering why I would write something like this for the street dudes. I didn’t, initially.

I wrote this for 4chan /pol/ American fascist and national socialist anons but the anons are mostly pussies with the exception of a few select posters. All you need to know if you are a street dude reading this is that the original text file I wrote, which inspired this little booklet, was levels above your skillset. Street bangers don’t need to know about Class IVb, 445 nanometer 80 watt laser rifles, parametric infrasonic cannons or how to derail trains. That’s shit that will be more appropriate for a civil war faction trying to become a standing government and alternative to the United States power structure. If they do need to learn that, they for damn sure don’t need to learn that shit yet. I can say with certainty that at least 50 to 100 posters out of the hundreds of thousands who go there are really about the shit they claim to be about and they are just waiting for civil war so they can get off the leash and spaz out. But anyway, I want this knowledge to be widely available for the following reasons, some of which are personal:

- Refusal of the United States Government to officially end the One Drop Rule for mixed people by amending OMB Directive 15 to include Biracial Categorization. If you will not end the One Drop Rule. You don’t have to. I will end America as a functional state and bring it to its knees by dissemination of the information herein. Through will or force, you will listen. You listen, I stop. You don’t, I won’t. We all know inner city violence is crippling America in every metric. You don’t want this document to be released. I will do the most with this and you federal ATF/FBI/CIA/NSA glowniggers will seethe.

- Sick of these lames and bitch niggas on all of this lame ass, soundcloud Midnight Society/83HADES e-banging cyber fuck shit.
- Sick of these fake niggas flexing like they are about that blicky shit but they won’t do anything in real life and turn bitch.
- Sick of street niggas shooting innocent 8 year old girls like Melissa Ortega in the face and missing the target constantly. (What kind of pussy ass motherfucker kills a fucking child? As Black men on the streets, do you not see or care how this shit makes Black people look? This is why everyone on Earth hates the Black man. This is affecting even Mixed people. Stop fucking shooting kids. Stop fucking killing little old Black ladies and fucking six month old babies. Grow the fuck up and hold yourself to a higher standard.)
- Sick of niggas killing old women, babies, stray cats, sidewalks, walls, planes, literally everything but the opp they aimed at.
- Sick of niggas sliding and then having to spin the block, then having to come back again, then come back next week.
- Sick of niggas killing each other (Umm what, nigga isn’t this book about guns?) [Yes, I am sick of niggas killing each other and that’s why I wrote this book about how niggas can kill each other more effectively. There needs to be one faction per racial group. One race, one nation. If Bloods are the thesis and Crips, the antithesis, tell me, what is the synthesis? One gang flying purple focused on protecting the Black man that only deals dope to other races and uses the money to build in the Black community and invest.]
- I want real growth and development. I want the street dude to defend his brother, protect his women, buy land, build a school
- I want street bangers to stop dying for blocks they don’t own. I want street gangs to do like the Italian and Russian mafias.
- I want street bangers to become land owners, owners of silver and gold, stock owners, crypto owners, business owners.
- I want the street bangers who are intelligent, tenacious, cunning and exceptional to excel throughout their lives.
- I want Crips, Bloods, Black Disciples and Gangster Disciples to go back to their purpose from when the Black Panthers split.
- I want gang rivalries to end nationwide and for all of the death and destruction in the Black community to end.
- I want all of the racial gang territorial beefing to end. This should be hashed out and all disputes resolved.
- I want police corruption and brutality to be combated by the gangs and want them to feed their people.
- I want gangs to protect their community from incursion and become more political for the sake of their race, their tribe.
- I want Black gang members to do like JFK’s father, go legit and put their sons in Harvard and prime them for the White House.
- I want drug dealers to stop becoming hood rich, becoming felons, going broke after getting locked up. INVEST.
- I want a big ass door to be opened and I want them to let the GDs in the door. (lmao)
- I want hedonism and excess greed to stop in the hoods of America and for people to take care of their people.
- I want gangs to have internal dialogue and assess their direction. Too many stupid people with no ambition. Wise up.
- I want an all Mulatto/mixed-race/biracial/lightskin gang to form in the streets and in the jails. One gang for my people.
- Faggot Democrat politicians and Black race hustler grifter ministers will send people to the hood from outside the community to try to mediate conflict in the community. This doesn’t work. Putting guns down will not work either because if you put down your gun, what guarantee do you have that the opps will put theirs down? Democrats need to repeal all anti-gun legislation and allow all people to defend and protect themselves. If felon firearm rights were restored and felons are allowed to get quality job training and employment plus mental health treatment, they would reintegrate without recidivism. Why the fuck would people be offing each other if they were employed and educated and making money? Get the psychopathic niggas off the field and in inpatient treatment, get people off these pills and drugs, rehabilitate offenders, uplift entrepreneurial niggas and the crime rate suddenly drops. Trying to get people to put their gun down when they have opps is stupid as fuck. Unlike Marxist/Socialist elements in the Democrat run cities trying to attack the guns, why not address the societal ills in the community and the fucking people. This gun violence can only be solved in cities like Chicago and Jacksonville when there are no more opps left and no more reasons to have opps. These people need to hash this shit out and get it out of their system. Let the chips fall where they may. Some off these niggas need rehab, mental health treatment, PTSD treatment, jail, jobs, education and some of these niggas need to just go out there and spin the block and/or get blown down.
- I want niggas to get into computers and not just for rapping or Facebook Live. Learn how to do technical, digital shit.
- I want people to utilize that prison googling research shit on people’s charges to take to the street.
- People need to learn how to dox their opps and find their opp’s home address and all of their relatives.

Now, I would like to throw a disclaimer in here. I am not responsible for any death, destruction, retaliation or incarceration that occurs as a result of you using this document to your benefit (or detriment). Everything in here was specified for a reason. If you fuck up and do not listen to my notes, you will get caught up. Remove and replace every part I tell you to. Regularly replace these parts, again and again. Use brass catchers at all fucking times. Always fucking collect every shell and melt them the fuck down. Do your own research to the best of your ability. If you aren’t smart enough, find someone smart in the set or someone smart in the hood and put them on. You will have to be at least 100 IQ, very ambitious and attentive to detail and nearly obsessive compulsive about detail to understand all of this shit. I’m not saying that as an insult but as facts. If you are not the type to avoid making mistakes, if you are not the type to follow instruction or pay attention, you will not benefit from this book at all. And in this subject, you do not want to be fucking up and making mistakes because shit like this will backfire on you. Be mindful that I have no experience with this shit at all and am writing based on an external observation and common sense. Those are shaky ass grounds to be making a mistake on. Do your own fucking research and use your common sense to not fuck shit up. That being all established and said, we begin. Also, I’m gonna say “nigga” a lot in this. Heads up. Don’t say I didn’t warn you about this shit.

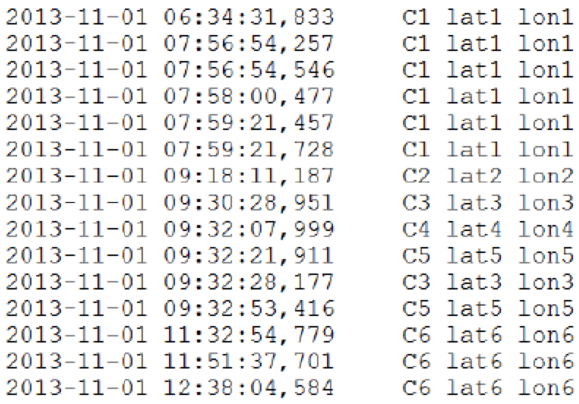
LEAVE YOUR FUCKING CELLPHONE AT HOME, YOU STUPID MOTHERFUCKER

Whenever you go anywhere, be it on foot or in a car, cell towers are in the area.
This is a cell tower:

This is also known as a cell site or a cellular base station. When you pass by one or are near one with a cell phone, your cellphone will be logged by the tower as having been near it at one point. They can use this to triangulate your position or prove you were in an area. Like this:



```
2013-11-01 06:34:31,833     C1 lat1 lon1
2013-11-01 07:56:54,257     C1 lat1 lon1

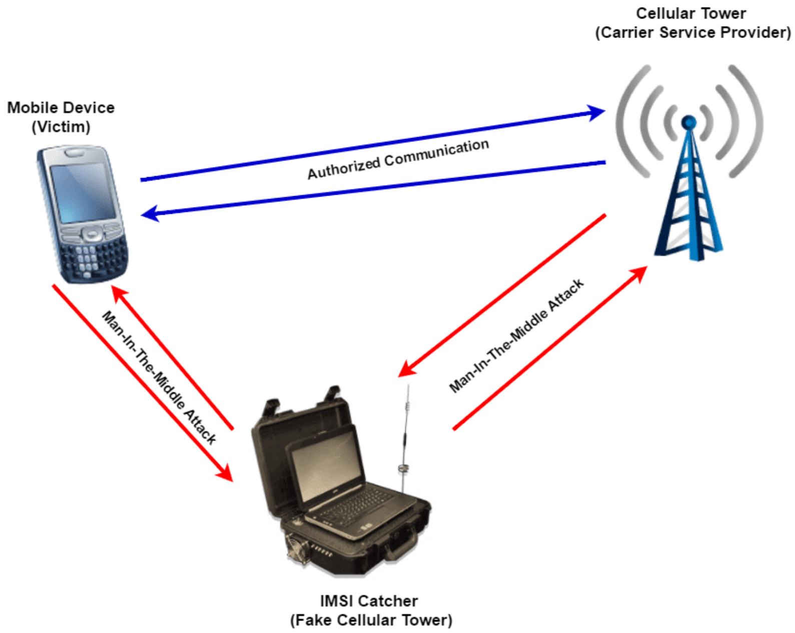
```

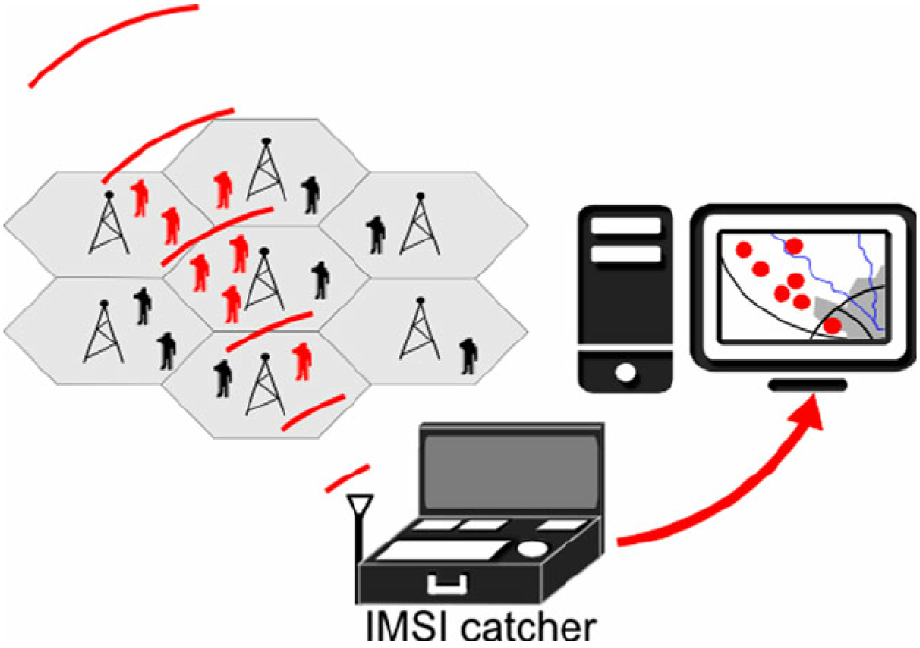
This is why the fuck you **NEVER TAKE A CELLPHONE, SMARTWATCH, FITBIT, IPOD, BLUETOOTH SMART SPEAKER, SIRIUSXM OR ONSTAR HAVING VEHICLE ANYWHERE WHEN DOING A DRILL. LEAVE ALL PHONES AT HOME.**

Another reason to NEVER BRING A CELLPHONE TO A FUTURE CRIME SCENE IS THIS DEVICE:



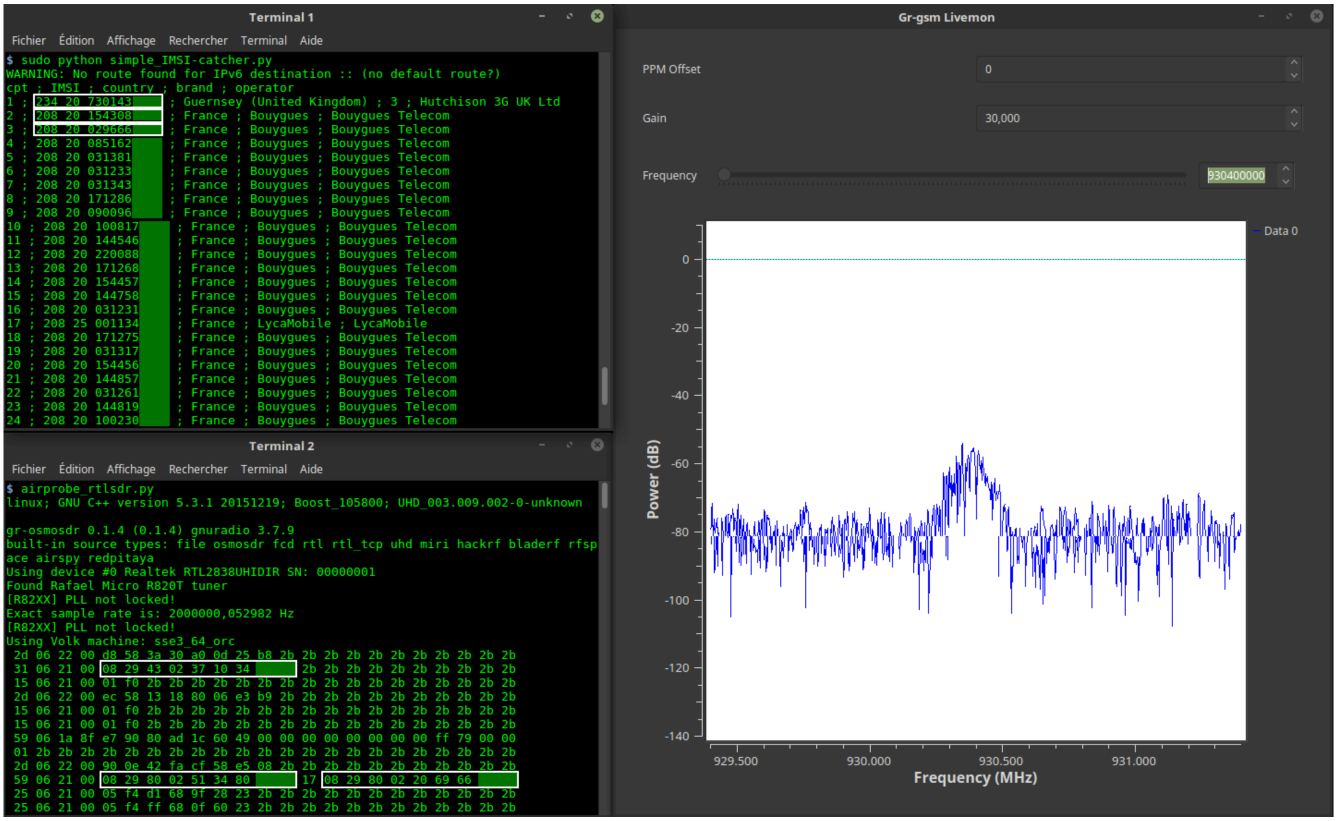
Cellular Tower
(Carrier Service Provider)
Mobile Device
(Victim)
Authorized Communication
Man-In-The-Middle Attack
Man-In-The-Middle Attack
IMSI Catcher
(Fake Cellular Tower)

This device is an IMSI CATCHER. IT TRACKS YOUR PHONES AND CAN TELL WHERE YOU ARE.



IMSI catcher

This is the illustration of the concept of how this device works.



```
$ sudo python simple_IMSI-catcher.py

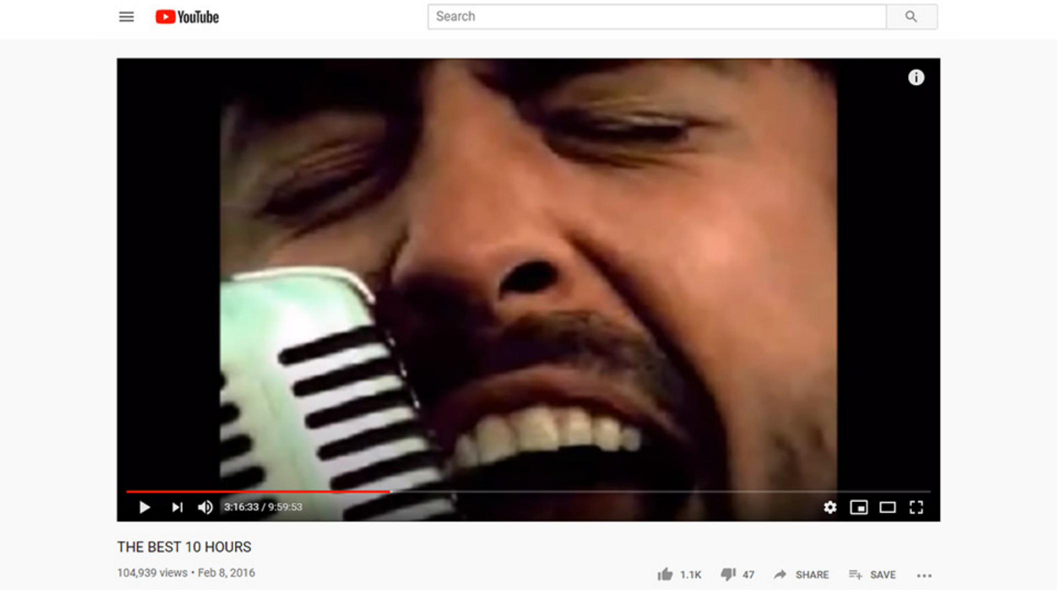
This is an example of logs from an IMSI Catcher. Pretend your phone is in this log. If your phone is in a Stingray's logs for some investigation, you have some fucking explaining to do to an attorney. Obviously shut the fuck up if you are picked up by police. Even if you do nothing wrong, being caught in a IMSI Catcher or Cell Tower log can backfire on you. This is why you leave this shit at home. Put your phone on a ten hour playlist of YouTube videos. LEAVE THE PHONE AT HOME, THEN, go out in a old 90's/2000's hoopty WITH NO BLUETOOTH, NO ONSTAR OR SIRIUSXM, with tinted windows and go out and handle your business.



THE BEST 10 HOURS

104,939 views • Feb 8, 2016

Example of a 10 hour YouTube video. Pick one, put your phone on a charger, play it, leave it on a fucking table and go. Alternatively, put it on PornHub on a five hour porn cumpilation and mute it and then leave it and go.

DOX THE OPPS, FIGURE OUT WHO IS WHO, DO RECON

A lot of Black people in the inner cities are registered Democrat voters. Same with Mexicans. They keep voting for these stupid leftist motherfuckers and crooked Black and Hispanic politicians promising change like Lori Lightfoot. They keep voting for this stupid shit and wonder why these fucking Marxists only trying to get paid do nothing about the fucking societal ills that plague the ghetto. You can't fucking progress like this. Insanity is doing the same shit and expecting a different result. When you have these faggot leftist District Attorneys like Gascon and Krasner, how the fuck do you think anything will improve? It will never happen. But I digress, lest this become a political rant about leftists. Older black people love voting, same with Hispanic and White, mixed/lightskin. Whatever the fuck. They prioritize that shit like food and water. If you're not in the streets, you vote. If you are in the street, your mother or your auntie votes. If she votes, she is in a voter registry. Voter registration is public and you can sometimes get a person's home address from this. All people have names. In the streets, people have hood names and call their birth names "government names." You can suprisingly find your opps address if you look up their mother or aunties on Whitepages, TruePeopleSearch, Searchpeoplefree, MyLife, Spokeo, etc. You can possibly even find your opp's house on Whitepages.

Too many of these faggot ass young niggas go out and hit innocents, hit the wrong person, mix people up and confuse some dude for their opp. If your opps are known to you, meaning you have seen their face and recognize them and know their names, you can recognize them and eliminate them. If you have seen your opps on Live, you can screenshot the Live and have a fucking photo of their face. What you then need to do once you have a photo of your opp is to get access to a printer. Avoid the public library if you can help it. Go to a homie with a printer and print this bitch nigga's photo out. Keep it on you and get some fucking binoculars from the sporting goods section of Walmart or from a Sporting Goods store like Dick's or Academy Sports. Study your opp's face or faces if you have several opps. If you are reading this, I'm assuming you have a laptop for making beats or rapping or whatever the fuck. If you are reading this shit on your phone, go hustle and buy one or go fucking steal one then get access to a printer and print the opp's photo. If your opp was incarcerated, then their government name is on file. Take FBG Duck for example (R.I.P. Duck) His street name is Duck. His real name is Carlton Weekly. If Duck was arrested, his name on the mugshot will be Carlton Weekly. You can search him up on Whitepages and people searching sites for Carlton Weekly and find his address. Sometimes it may not even turn up, especially if he is not on the lease or is just crashing there but is not a residence of the place. This is where recon comes in. Go to the area and do surveillance. Make sure that your opp is at that place. Go on Facebook, look for your opps. Don't taunt them or threaten them, that can be used in court. If you are able to, find their government name. If you can, find their moms or their family members in the Friends section. Search for their ass on Whitepages and get their address and verify the information by looking at the relatives. If the Whitepages relatives match up with people on the person's friend list, you have the target.

For example, this is FBG Duck's mom. If Duck has a Facebook with his mother on there, and you know his name is Weekly, find all people with the same name as him and you can begin to look them all up and see what you find. You may not get lucky but sometimes, you just might get lucky doxing relatives in the opp's friend list:

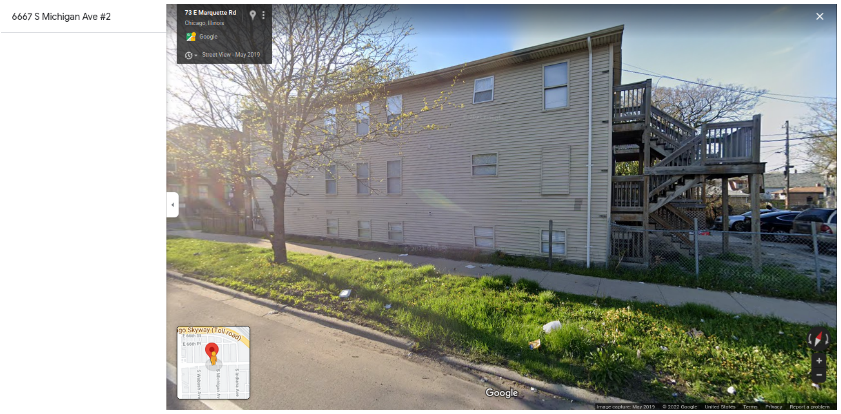
LASHEENA'S CURRENT ADDRESS

6667 S Michigan Ave Apt 2
Chicago, IL 60637

OTHER LOCATIONS

Markham, IL
Saint George, UT

If FBG Duck was your opp and you were on his Facebook friend’s list, you could see his family in the friends list and if you can, you can go on their pages, start digging, figure out who is who and turn some names into addresses. You can’t take your phones or anything so you have to write this address out or remember it in your head. Go on Google Maps and study the fucking location. Be sure to wear a balaclava (Google it) or a ski mask, something covering your whole face when you do recon in that area.

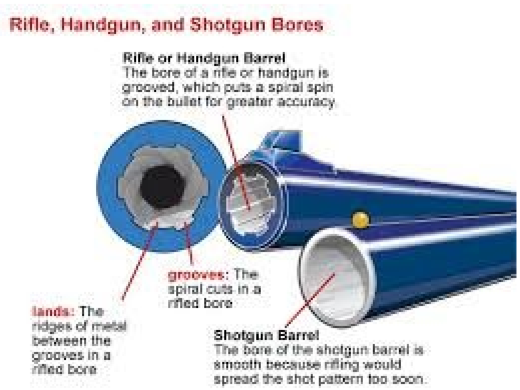


Once you have a good lead on your opp or your opps, go to their neighborhood and be observant. If you can, get off the street because if you are the opps on a block you are not from or supposed to be in, you will get blown down and your head will be splattered all over your car seat and new binoculars. Try to get into an adjacent (nearby) building, preferably right across the street. And get in to an elevated vantage point. Go to a second floor balcony or a window on a second or third floor of a building with blinds and look. If that’s not possible, get onto a roof or into a house across the street.. Lets say your opp has pink dreads (no homo). Just say for the example your opp has pink dreads and a scar on his face. If you are doing recon in that area, and you see a nigga with pink dreads and a scarred face, it’s pretty fucking safe to assume that’s the right nigga. So now, you have confirmed that this nigga is at that location. Now, you can start figuring out the nigga’s routine. Once you can get this nigga secluded or if you are sure you will not be fired upon, pick a time or place in your head where you will assassinate the target. It can be either in his hood or wherever he or she goes on their routine. You could just shoot the house up but you don’t know who will be in there, if they have cameras, anything. This is going into a situation blindly and it’s fucking goofy. Dumb motherfuckers are goofy. Don’t be goofy. Once you have the target in your sight, pull up on them. Up the blick. Actually use the fucking iron sights on the gun.

BARRELS, BULLETS AND SLUGS

With the gun loaded, cocked and pointed at the target and the car **stopped**, pull the trigger and let off every shot from the **FRONT PASSENGER SEAT OR RIGHT REAR PASSENGER SEAT**. The target should be on the **right side of the car**. If the driver gets **hit directly in the face, the car becomes inoperable with a 200 lb dead motherfucker in the seat**. If you are a pussy or you're not going to shoot, floor it and burn rubber. You should be using **FRANGIBLE AMMUNITION** AND **BRASS CATCHERS.**

Nearly all handguns and rifles (and the very occasional shotgun) have rifled barrels. What this means is that there are lands and grooves cut into the barrel for the purpose of imparting spin to the bullet as it travels down the barrel:

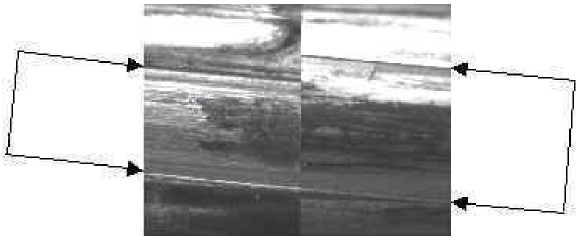


Rifle, Handgun, and Shotgun Bores
Rifle or Handgun Barrel
The bore of a rifle or handgun is grooved, which puts a spiral spin on the bullet for greater accuracy.
grooves: The spiral cuts in a rifled bore
lands: The ridges of metal between the grooves in a rifled bore
Shotgun Barrel
The bore of the shotgun barrel is smooth because rifling would spread the shot pattern too soon.

Think of a football (American football, for the rest of the world) being thrown by a quarterback. As he throws it, he's imparting rotational torque (spin) to it to ensure that it flies straighter; the same concept is true of bullets. Smoothbore muskets (like in the revolutionary war days and prior) had no rifling and therefore had a maximum effective range of perhaps 100 yards at best; the projectile could certainly go farther than that, but not with any sort of accuracy. The spin imparted by the barrel's rifling stabilize the bullet and give it a degree of resistance to being pushed off course, thus extending its range.

The reason this matters to your question is that as the bullet travels down the barrel it's always in contact with the lands of the rifling and is being pushed through the barrel with considerable force, so it carves nearly microscopic notches into the bullet as it travels:

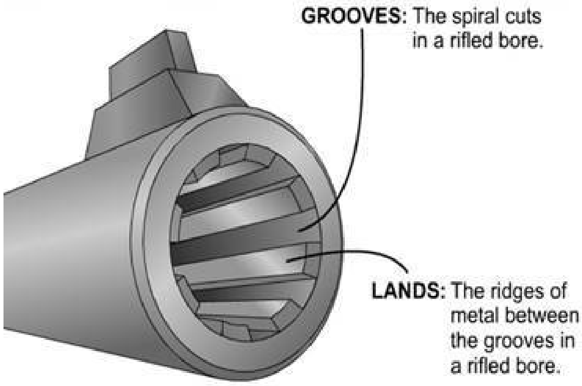
If the bullet survives impact with minimal deformation (which is a *big* if), then the pattern of notches on the bullet found at the scene can be compared under a microscope to the pattern of notches on a sample bullet fired from a particular gun. If the notches line up perfectly you've got a pretty compelling case that *that* gun was the one that fired *that* bullet. These markings are known as striations.



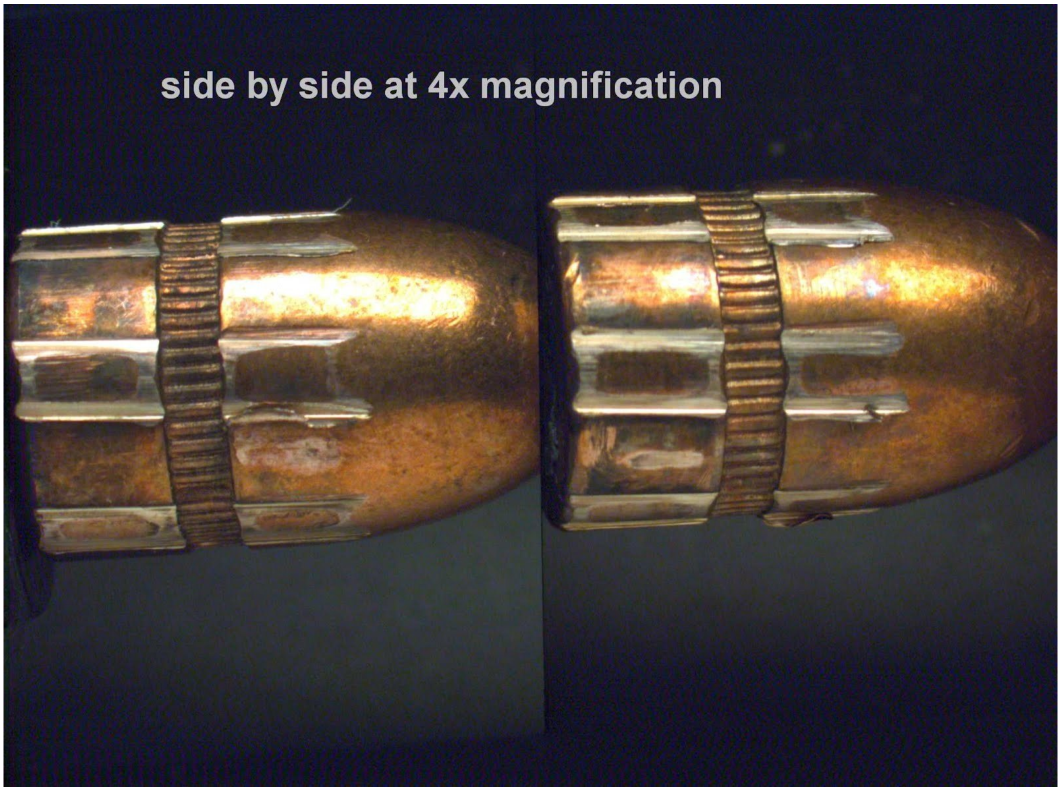
In this way you can circumstantially tie a person suspected of murder to a given murder scene:

"*This gun was found in your possession, we tested the gun and the bullet tested matched one found at the murder scene, therefore it's reasonable to assume this gun was at the murder scene, and since it was found in your possession we assume you were there too. What was your alibi again?*"

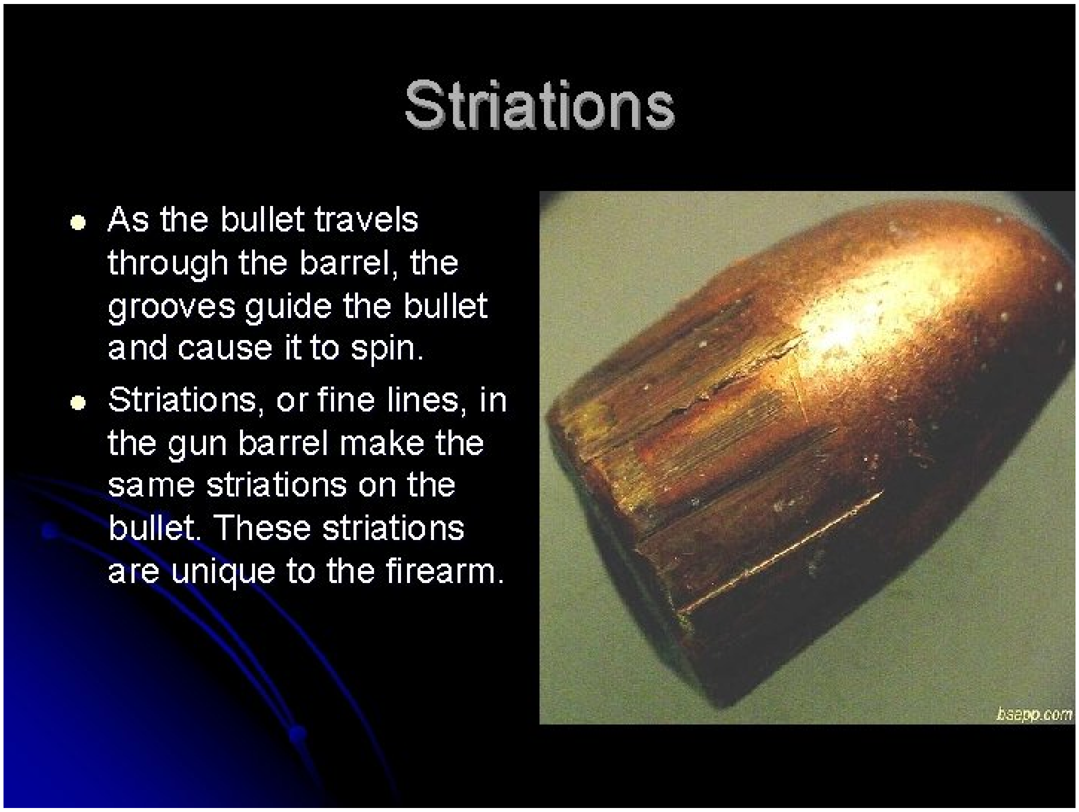
Works great in theory, and *occasionally* in the real world. The trouble is that bullets are typically made of soft lead with a copper jacket and deform quite a bit when they strike anything even remotely hard. Add to this that hollowpoint bullets are *designed* to open up when they strike something like tissue, and you can probably start to see why it's fairly uncommon to find a bullet intact enough to match up to a test round with any sort of certainty.



GROOVES: The spiral cuts in a rifled bore.
LANDS: The ridges of metal between the grooves in a rifled bore.



side by side at 4x magnification



Striations

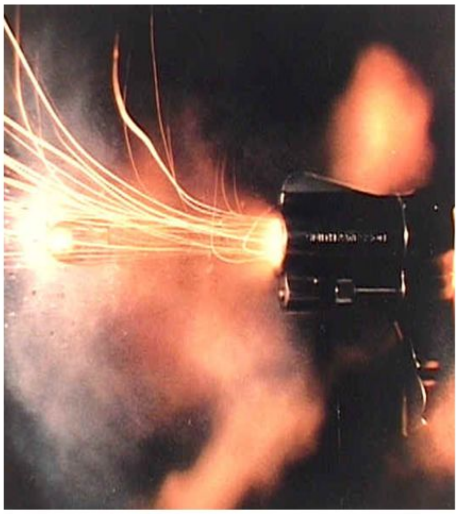
- As the bullet travels through the barrel, the grooves guide the bullet and cause it to spin.
- Striations, or fine lines, in the gun barrel make the same striations on the bullet. These striations are unique to the firearm.

bsapp.com

EVERY BARREL IS UNIQUE AND HAS A UNIQUE BALLISTIC FINGERPRINT

Forensic Ballistics

- Forensic Ballistics is the science of analyzing firearms, bullets and bullet impacts.
- Ballistic fingerprinting is analyzing firearm evidence to determine if that particular firearm was used in the crime.



What is Forensic Ballistics?

Ballistics = the study of projectiles (bullets) and firearms.

Forensic ballistics is the scientific analysis or interpretation of all ballistic related evidence with the purpose of interpreting and establishing the facts in a shooting related crime

First, a little history lesson.

Wham! Bam! Thank you, Ming.

- The invention of gunpowder led to the development of firearms.
- Gunpowder first appeared in use in China over a thousand years ago, but was used primarily in firecrackers and only sparingly in weapons for military use (canons and such).
- The knowledge of gunpowder manufacture spread to Europe in the 14th century did not at first lead to military usage.
- Once they realized how much damage a projectile can do to a knight's armor or a fortification, the use of firearms proliferated rapidly.

How does Gunpowder (Black Powder) work?

- Gunpowder, made of a mixture of
  - sulfur,
  - charcoal, and
  - saltpeter (potassium nitrite)
- Its explosive force is due to the fact that 1 mole of solid powder will, when ignited, produce 6 moles of gas.
- This rapid expansion in the enclosed space of a metal tube could be used to drive a projectile at high speed in a specified direction.
- Modern gunpowder is a more refined version of the primitive gun powder
- In modern gun powder, the chemical composition has been altered to provide the *greatest expansion* with the smallest quantity of gun powder and the least amount of residue.

Gunpowder when unfired. It is a granular (powdery) substance composed of potassium nitrate (saltpeter), sulfur and charcoal (carbon).

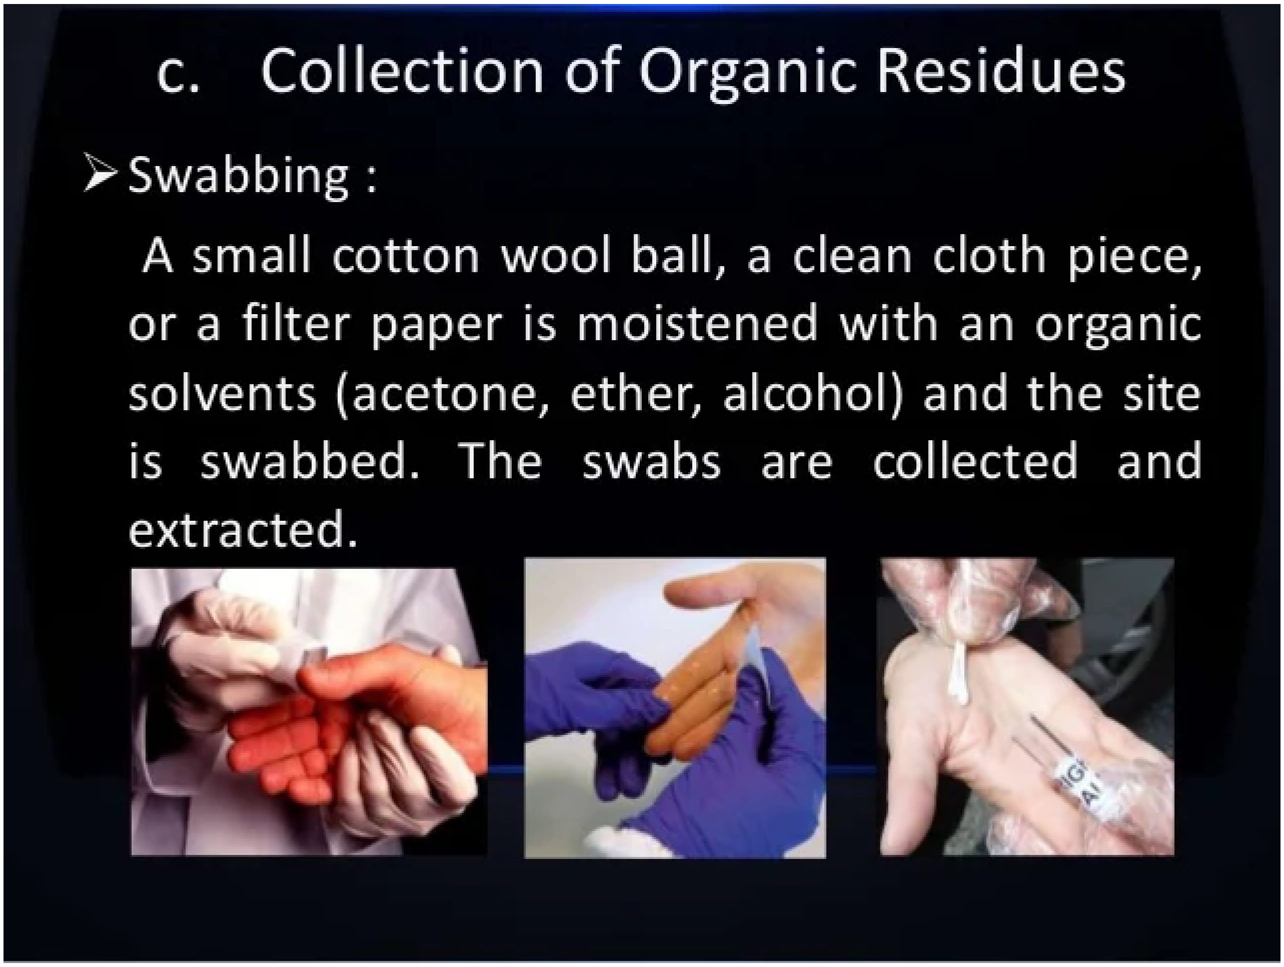
When a gun is fired, the powder burns but not all of it so the residual powder remains on your hands as an ashy dust. Gunshot residue.

A vaporous cloud of smoke containing microscopic GSR particles is discharged upon firing a gun. This high speed photograph demonstrates how GSR particles (in the white cloud) can be deposited onto surrounding surfaces, especially the hands.

When these nitrates (explosives/GSR) get on your hands and clothes after firing a gun, forensic investigation can reveal you have fired guns. If you do a drill – SHOWER, WASH YOUR HANDS, AND WASH YOUR FUCKING CLOTHES.

@wew
BCI CONDUCTS GUNSHOT RESIDUE TESTING
DETERMINES WHETHER SOMEONE WAS INVOLVED IN A SHOOTING

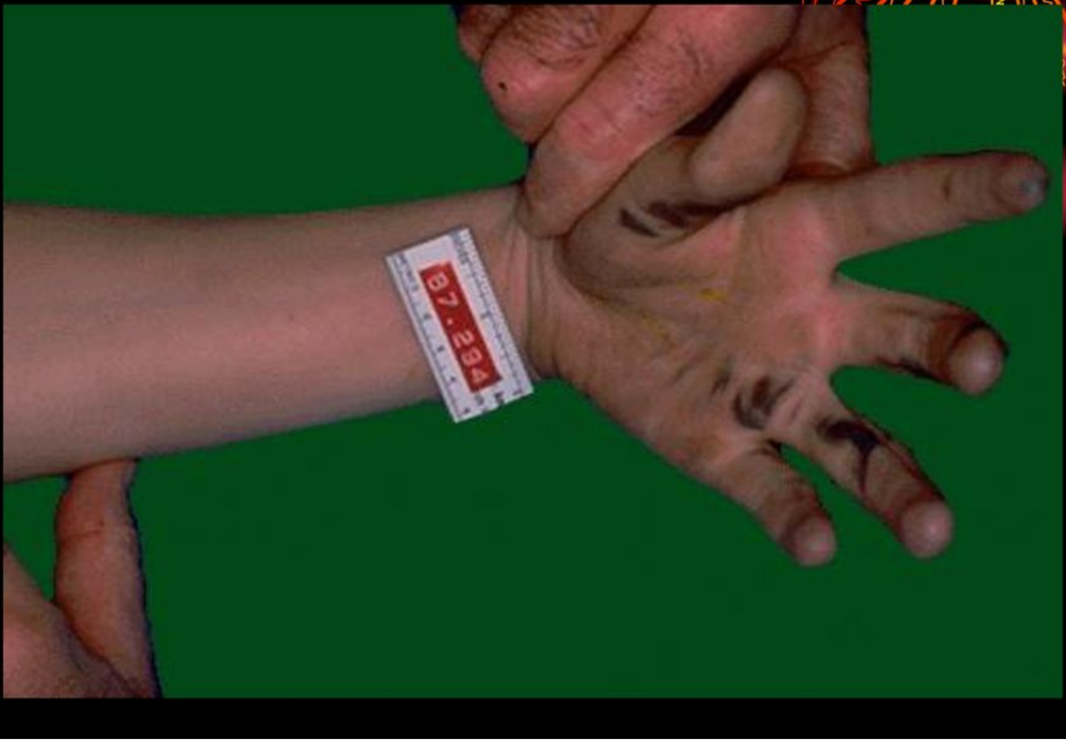


c. Collection of Organic Residues

- Swabbing :

  A small cotton wool ball, a clean cloth piece, or a filter paper is moistened with an organic solvents (acetone, ether, alcohol) and the site is swabbed. The swabs are collected and extracted.

GSR on the hand of a suicide victim, proving he was holding the weapon when it was fired.

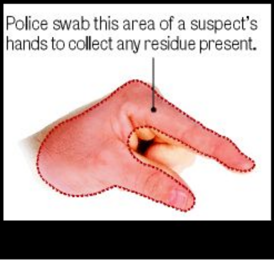


- Tape Lifting :

  An inert tape of suitable width (2-3 cms.) is taken and the site is taped. The tape is used as such, or extracted and the extract is utilised for testing. The tape lifting is becoming popular for its convenience and application is all situations including lifting GSR from cadavours. The tape picks up both organic and inorganic constituents of GSR.

How is GSR detected?

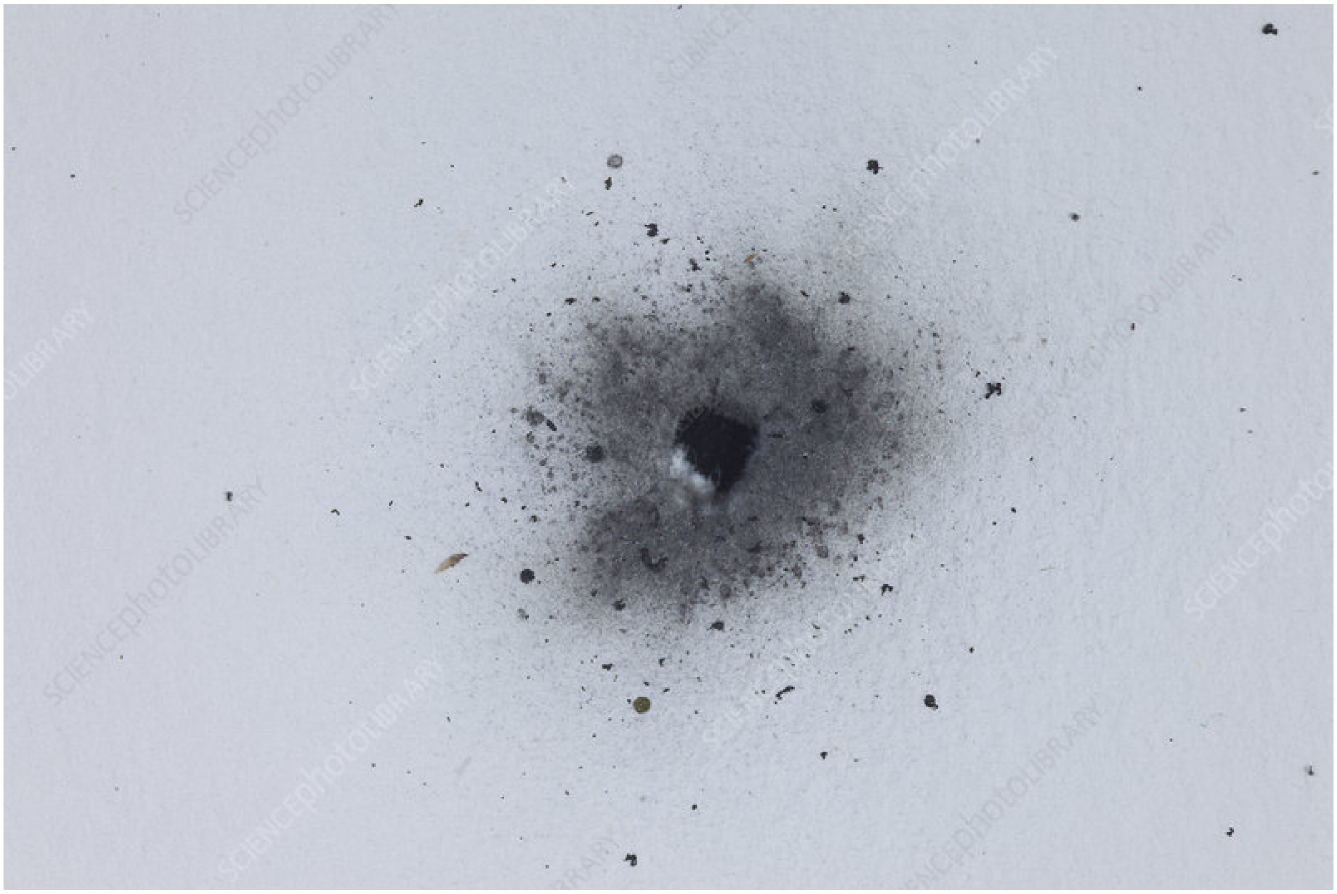
- Primer is generally made up of barium nitrate and antimony sulfide
  - Most GSR detection techniques concentrate on barium and antimony



Police swab this area of a suspect's hands to collect any residue present.

How is GSR detected?
GSR Chemical Tests

- ***Griess Test***.
  - Will not interfere with later tests for lead residues
  - Detect the presence of ***nitrite*** residues
  - Primary test used by forensic investigators



TO AVOID GETTING GUNSHOT RESIDUE ON YOUR HANDS, USE LEATHER GLOVES

123RF

DON’T DO THESE BAD GRIP TECHNIQUES. EVER.

LUCKY GUNNER

NOW, BACK TO FRANGIBLE AMMUNITION AND BULLET FORENSICS AFTER THE FRAMES ARE ADDRESSED.

If you are caught with a dirty gun, you will pay for every crime that gun was used in, whether you did it or not. If you came into possession of a stolen gun, even if it has no bodies on it, you will go to jail for an illegally obtained firearm. A privately sold firearm would have a bill of sale or some means to prove transfer of ownership, even an Armslist correspondence. A stolen gun will have its serial on file with the police so when they catch you with it, you're getting charged. The best position for you to be in, assuming you are not a felon or someone not allowed to have a gun, is to have a clean gun. A clean gun would be a gun that is neither stolen, nor has any bodies on it. As a person allowed to own a gun, you having a clean gun is your legal right. As a felon or someone not allowed to own a firearm, your course of action is to obtain something that is not legally seen as a firearm, like crossbows, knives, bows, airguns and black-powder, nitro fire, cap-and-ball revolvers, pistols and rifles. If you want to own a gun and intend to use it for legal reasons, you will have to go through a background check, go on file with the ATF, pay taxes, give fingerprints, etc. It's not worth the hassle to be honest. A trackable smart gun, with micro-stamping, some type of RFID smart bullet and a serial number deep in every part of the gun would be a good way to make gun theft harder and make gun homicides easier to counteract. But, this will never happen and nor should it. The best gun for a person to have in any circumstance, is a ghost gun. You should never have a gun with a filed out serial number or bought off the streets. Get a Polymer80 receiver or in the case of an AR-15, a 80% lower. You want a ghost receiver with no serials.

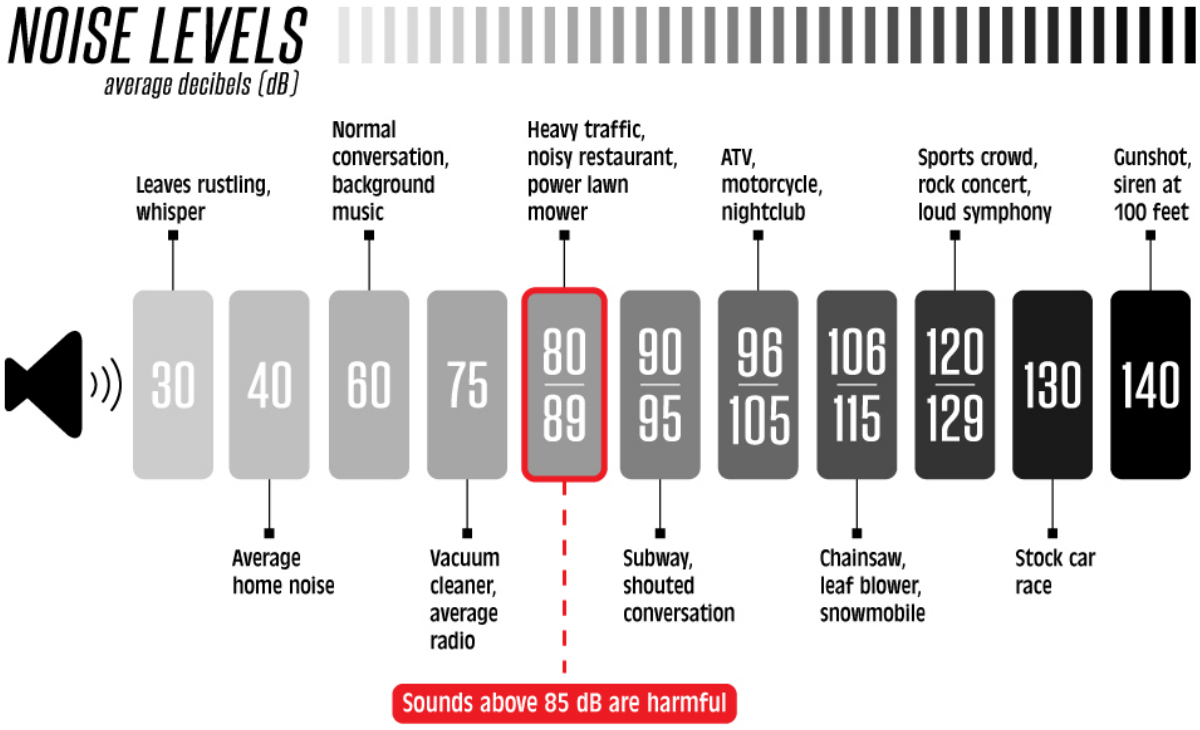
FULL-FREQUENCY™ FILTERED HEARING PROTECTION
Westone
Variable Protection
SHOOTER

These electronic earmuffs are pretty good but this is doing the most when it's not necessary.

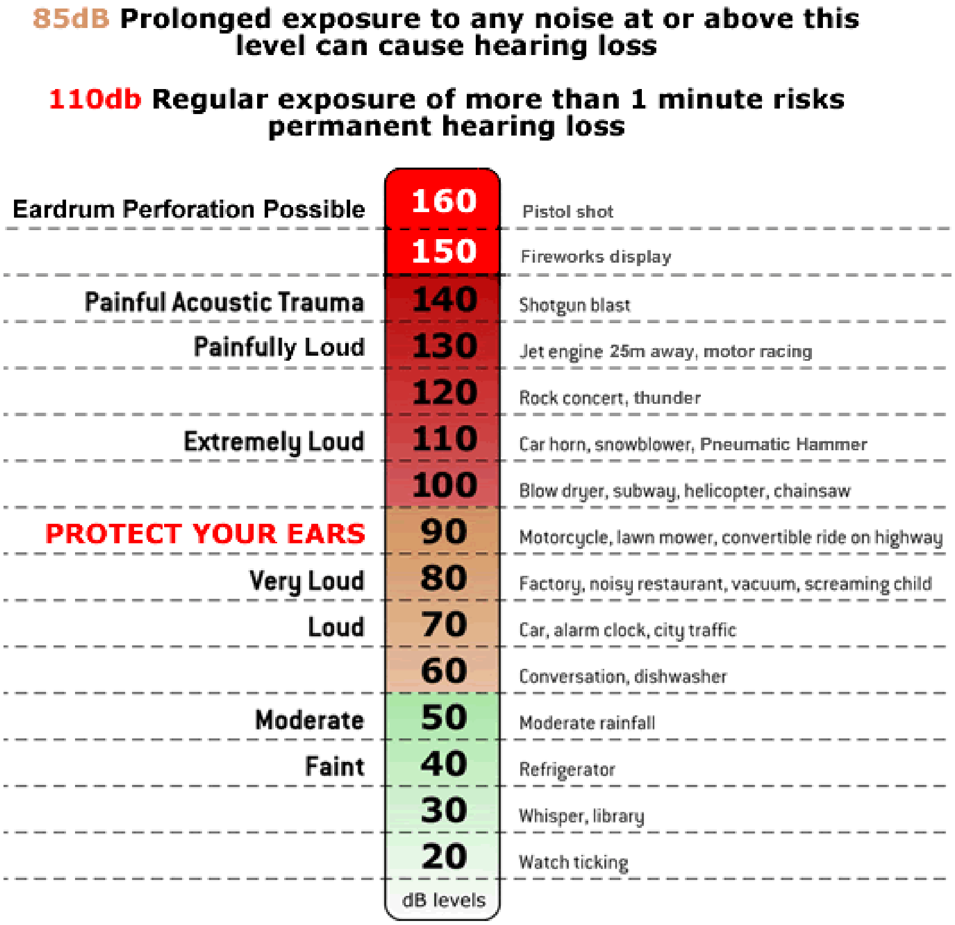
Westone is low profile and they make the best ear plugs. You can not go wrong with this.

Get the Westone earplugs. If anyone asks (Some karen white store employee might ask, even though it's not their motherfucking business), you're doing home renovations and need strong earplugs for a "powder actuated nail tool"

Do not elaborate any further. Ask for anything that reduces by 30 decibels or more. 33 at the most.



Oh and by the way, silencers only reduce a gunshot to like 120 - 130 decibels. Which is as loud as a fucking plane.



85dB Prolonged exposure to any noise at or above this level can cause hearing loss

110db Regular exposure of more than 1 minute risks permanent hearing loss

	dB levels	
Eardrum Perforation Possible	160	Pistol shot
	150	Fireworks display
Painful Acoustic Trauma	140	Shotgun blast
Painfully Loud	130	Jet engine 25m away, motor racing
	120	Rock concert, thunder
Extremely Loud	110	Car horn, snowblower, Pneumatic Hammer
	100	Blow dryer, subway, helicopter, chainsaw
PROTECT YOUR EARS	90	Motorcycle, lawn mower, convertible ride on highway
Very Loud	80	Factory, noisy restaurant, vacuum, screaming child
Loud	70	Car, alarm clock, city traffic
	60	Conversation, dishwasher
Moderate	50	Moderate rainfall
Faint	40	Refrigerator
	30	Whisper, library
	20	Watch ticking

So, what do you need to do if you are in the street, shooting at people?:

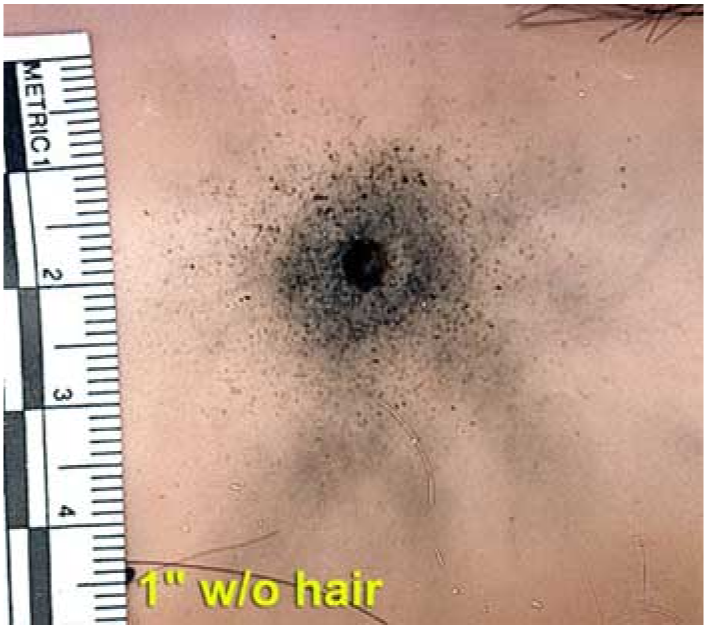
1. **COVER YOUR FUCKING FACE**
2. **WEAR LEATHER GLOVES**
3. **COVER YOUR EYES UP AS WELL**
4. **LOOK AT WHAT YOU ARE AIMING AT WITHOUT CRINGING**
5. **USE THE GUN’S SIGHTS**
6. **FIGURE OUT WHERE THE OPP IS**
7. **HIT THE OPP WHILE STATIONARY IN YOUR VEHICLE**
8. **USE AN OLD VEHICLE WITHOUT ONSTAR OR ANYTHING TRACEABLE.**
9. **GET TINTED WINDOWS**
10. **DO WALK UPS OR DO A HIT ON A BICYCLE AS AN ALTERNATIVE TO A DRILL IN A CAR THAT CAN BE EASILY IDENTIFIED AND HARD TO DESTROY.**
11. **WEAR EAR PROTECTION**
12. **WIPE LEATHER GLOVES WITH WET WIPES OR BABY WIPES TO CLEAN THEM OF GSR.**
13. **SHOWER AND SCRUB YOUR HANDS WITH SOAP.**
14. **WASH YOUR CLOTHES AND YOUR BALACLAVA.**
15. **SHUT THE FUCK UP.**
16. **DO YOUR DIRT BY YOURSELF OR WITH YOUR CREW. DAY ONE NIGGAS.**
17. **USE FRANGIBLE AMMUNITION OR HOLLOW TIP AMMUNITION ONLY.**
18. **SHUT THE FUCK UP ON LIVE.**
19. **DON’T BECOME A DRILL RAPPER.**
20. **DON’T BE FLEXING WITH GUNS ON SOCIAL MEDIA. REAL G’s MOVE IN SILENCE.**
21. **LEAVE YOUR CELLPHONE AT HOME.**
22. **FIGURE OUT WHAT THE OPP LOOKS LIKE AND FIND A WAY TO REMEMBER THEIR FACE WITHOUT NEEDING YOUR PHONE.**
23. **DO RECONNAISSANCE IN THE TARGET’S AREA OF OPERATIONS.**
24. **SHOOT FROM THE RIGHT SIDE OF THE CAR, FACING THE TARGET.**
25. **GET A POLYMER80 RECEIVER WITH NO SERIAL NUMBER ON IT.**
26. **FOLLOW EVERY INSTRUCTION HEREIN.**

SLUGS VERSUS HOLLOW POINTS VERSUS FRANGIBLE AMMO

Lead shot
Pellet
Slug

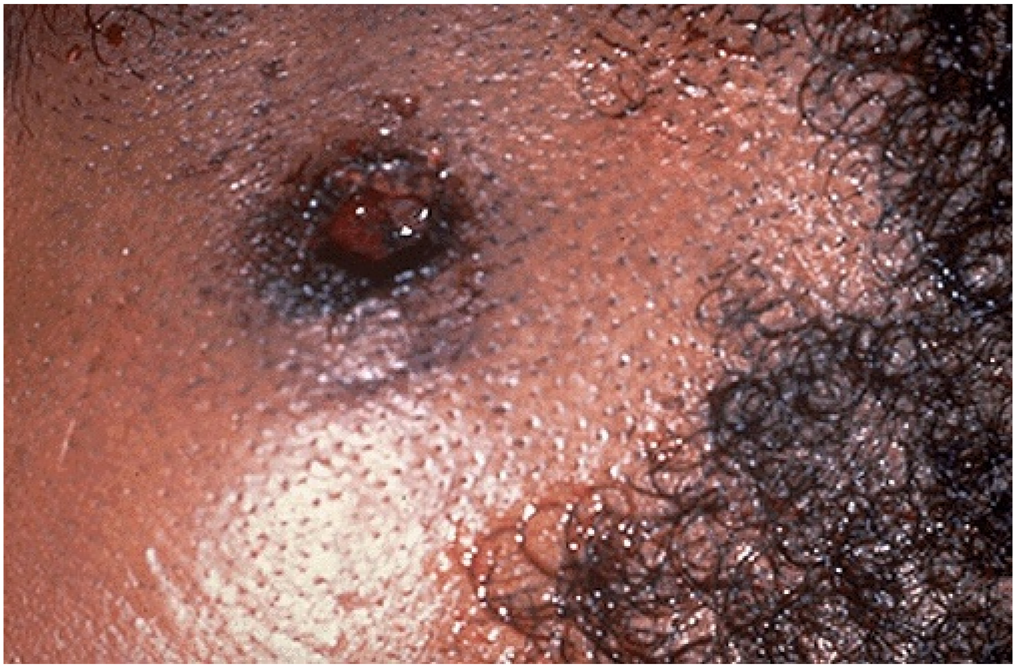
Slugs are the jacketed bullet that are not hollow and not frangible. This shit will be pulled out of a person and put into evidence. This can lead to a bullet being matched to a gun.

A person like this perhaps.

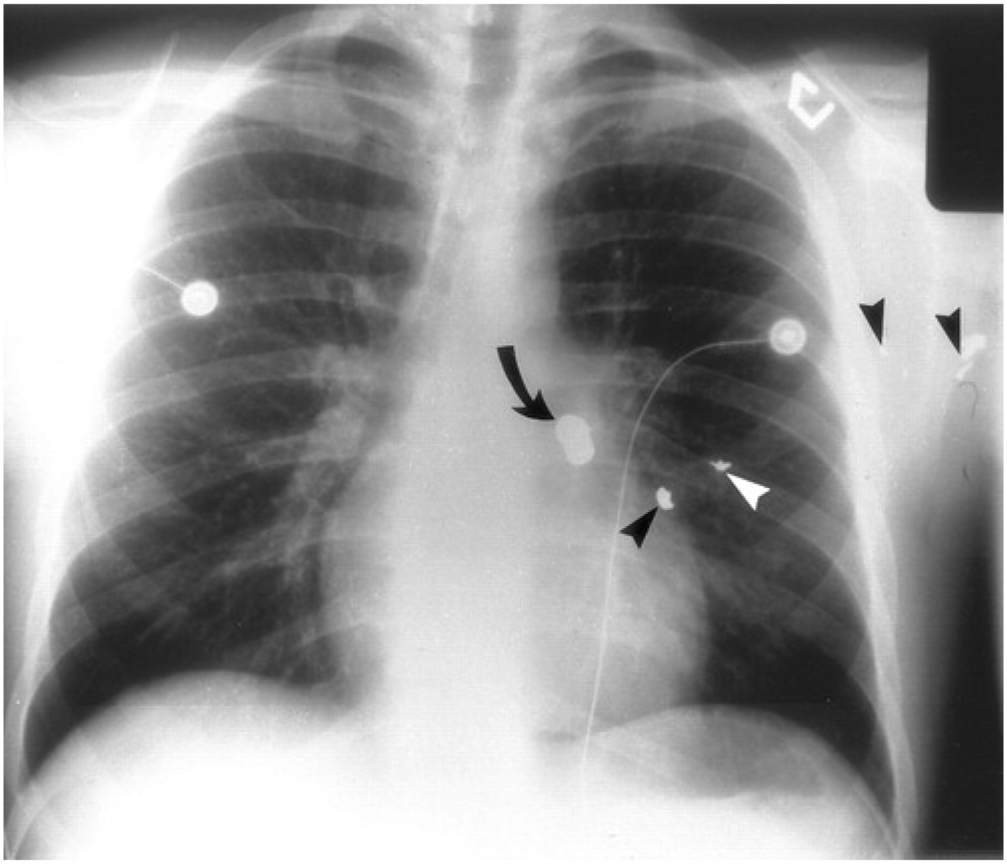


METRIC 1
2
3
4
1" w/o hair

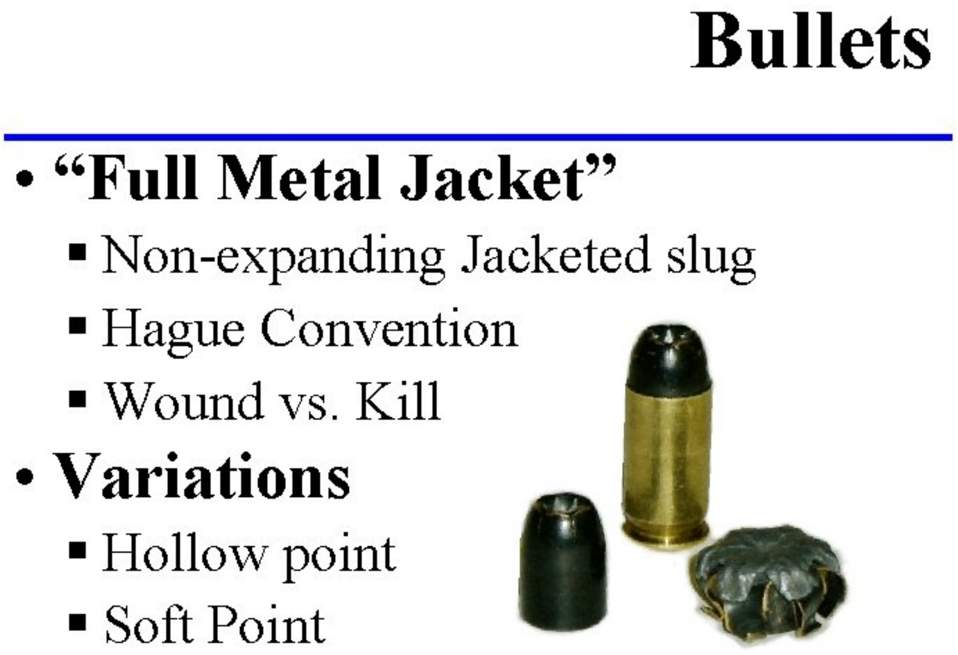
Or this.



Or even this.



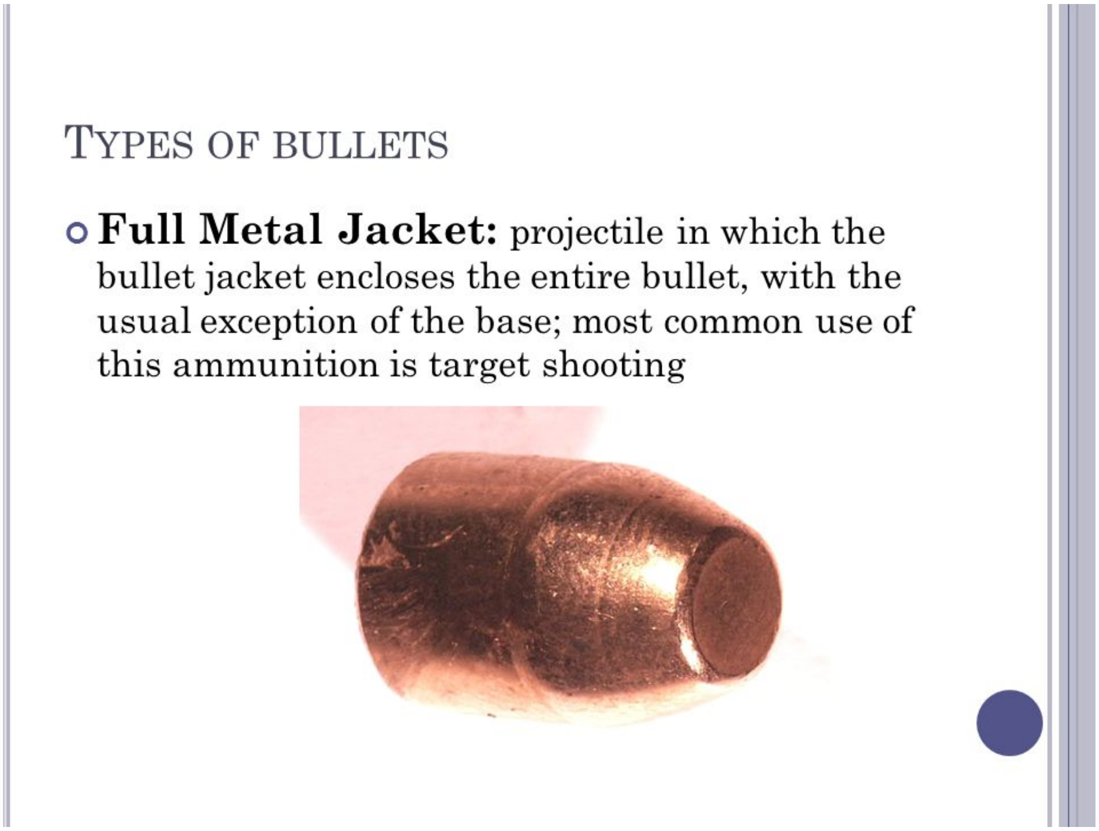
Slugs, that remain relatively intact enough for forensic investigations.



Bullets

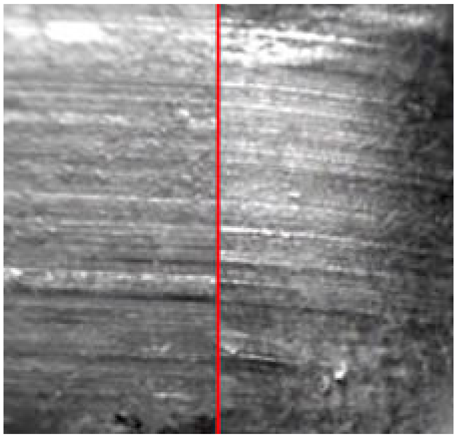
- **"Full Metal Jacket"**
  - Non-expanding Jacketed slug
  - Hague Convention
  - Wound vs. Kill
- **Variations**
  - Hollow point
  - Soft Point

Hollow points make investigation harder but not impossible. Using FMJ is asking for it.



TYPES OF BULLETS

- **Full Metal Jacket:** projectile in which the bullet jacket encloses the entire bullet, with the usual exception of the base; most common use of this ammunition is target shooting

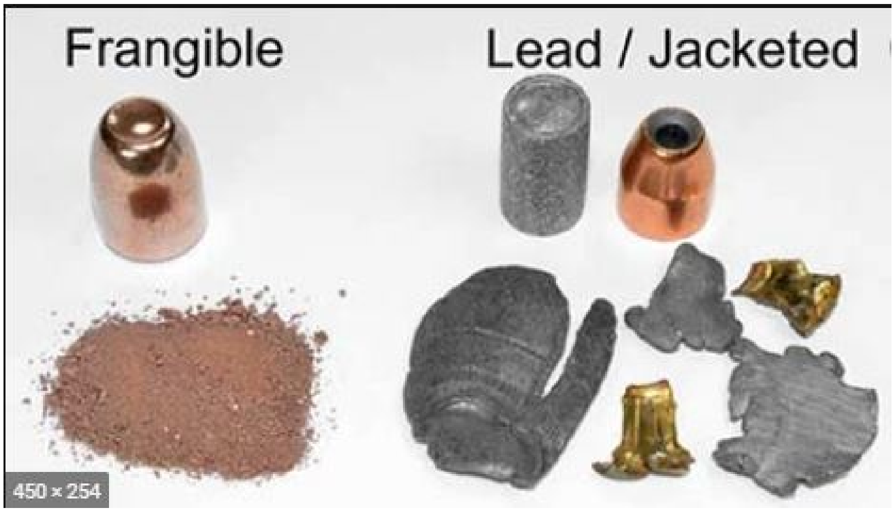


Why even have this problem? Just use hollow points or frangible ammunition. Frangible ammunition is the best ammunition.

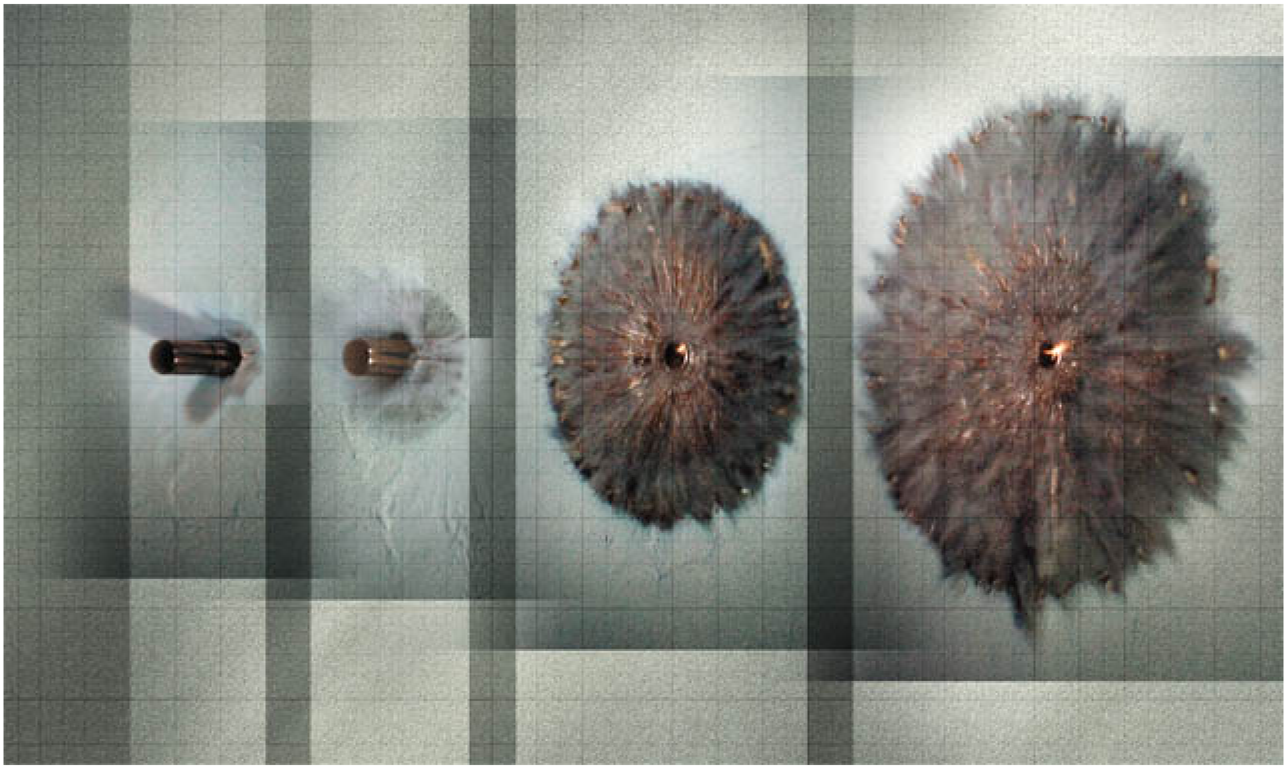
Avoid the full metal jacket jew.

What is frangible ammunition, muhfucka?

I’M GLAD YOU ASKED!

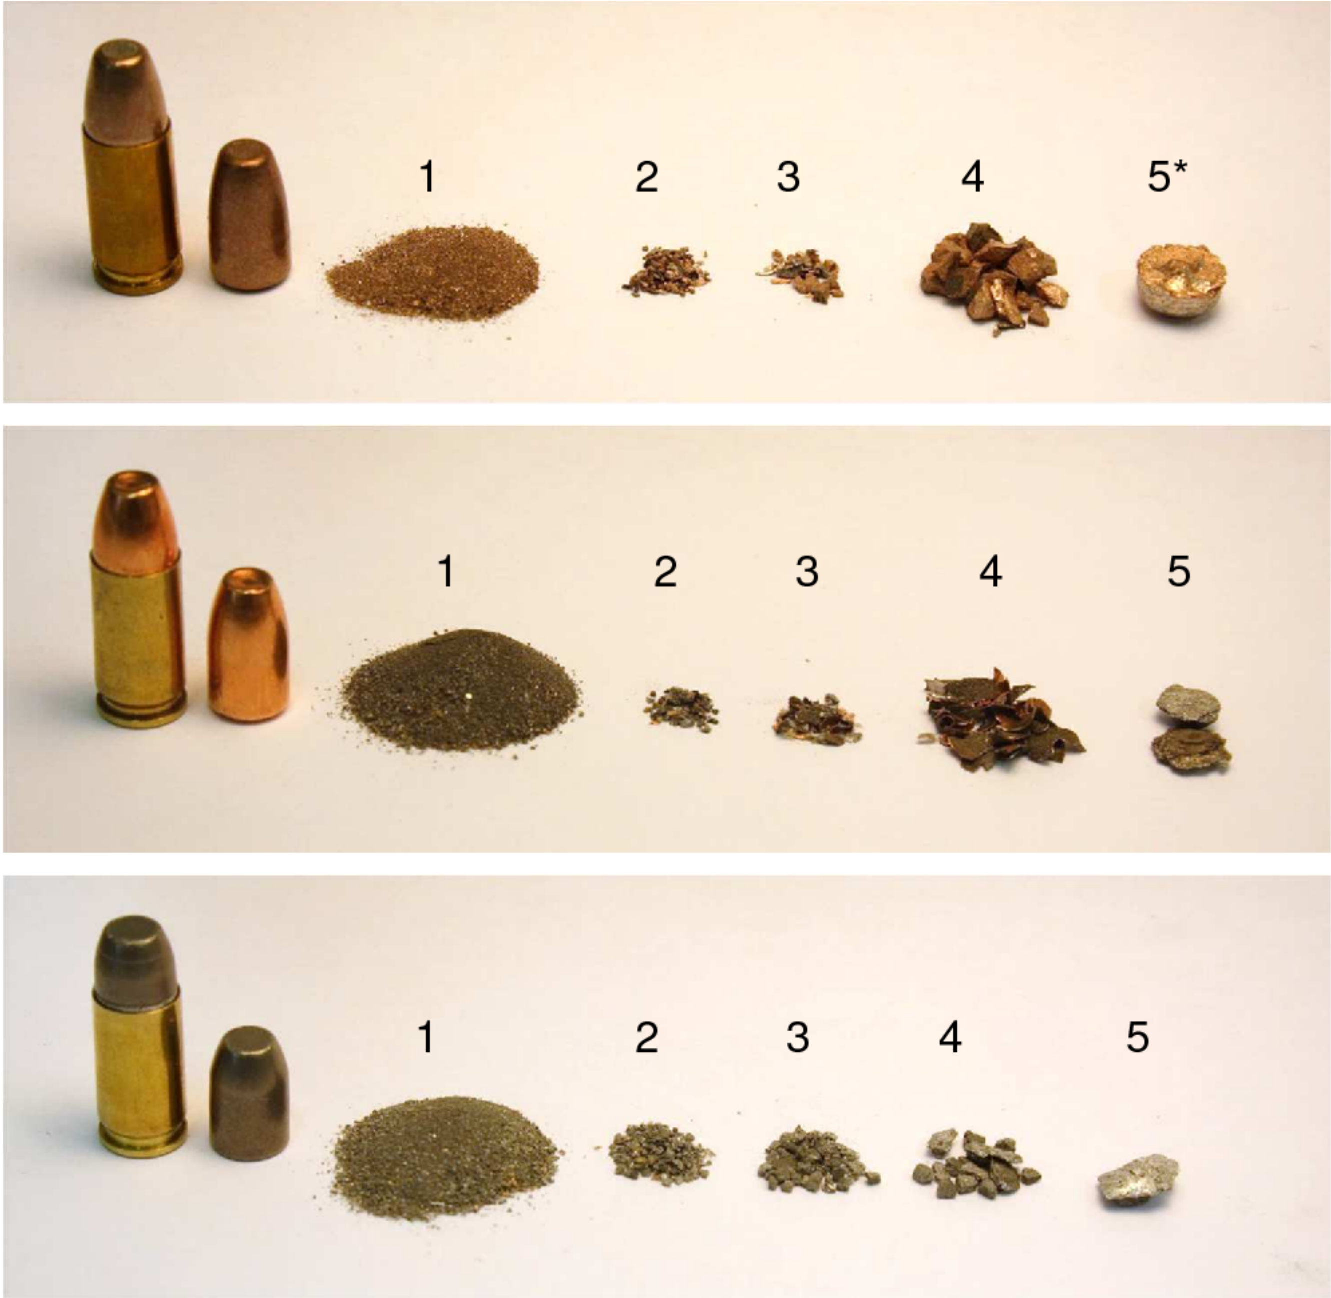


Frangible
Lead / Jacketed
450 × 254



TARGETBARN.COM

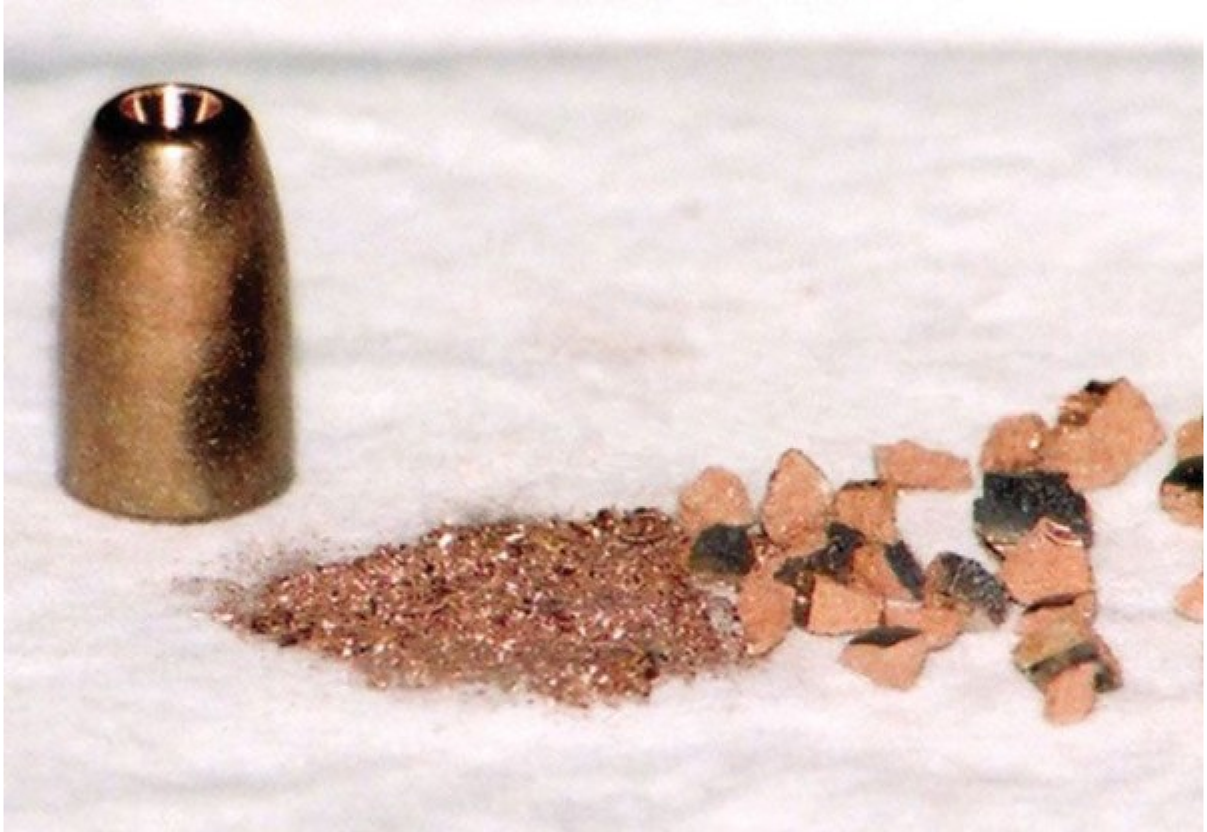
Before
After



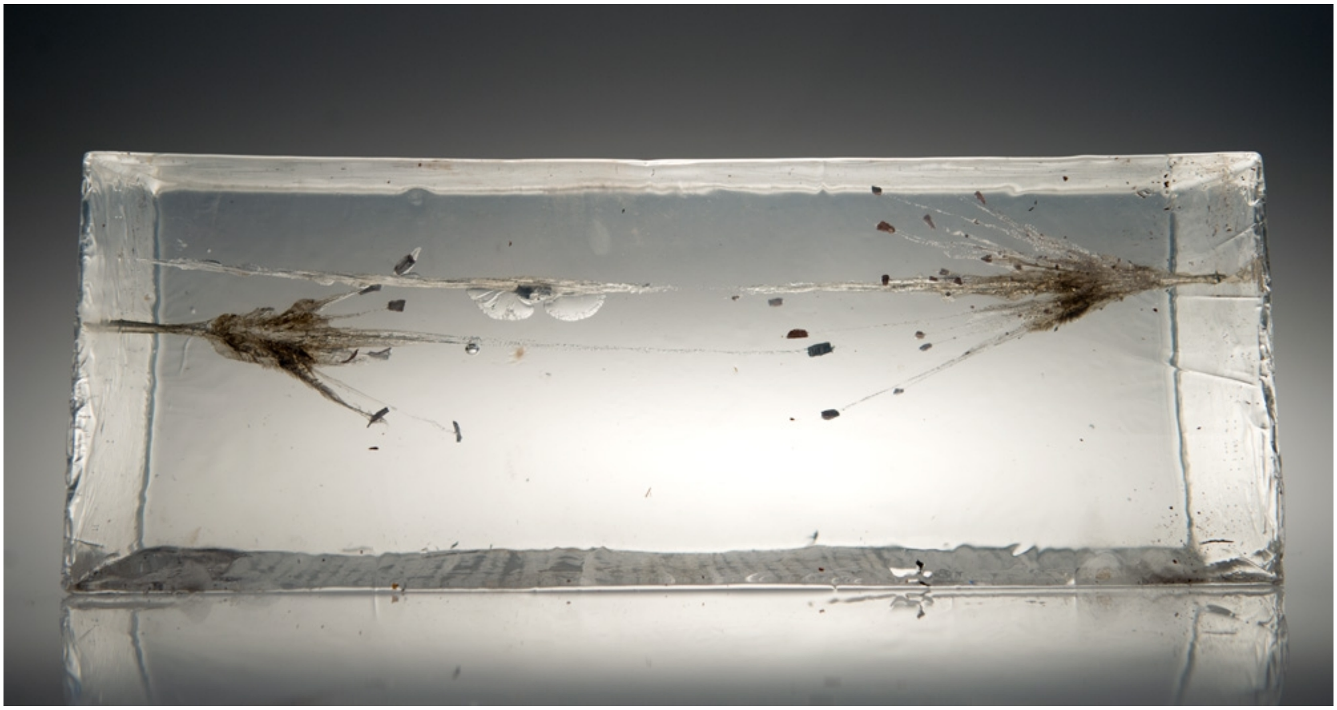
The frangible bullet disintegrates when it hits the target, leaving nothing for ballistics.

Shotguns with no rifling alternatively do the same shit. Buckshot has no striations.

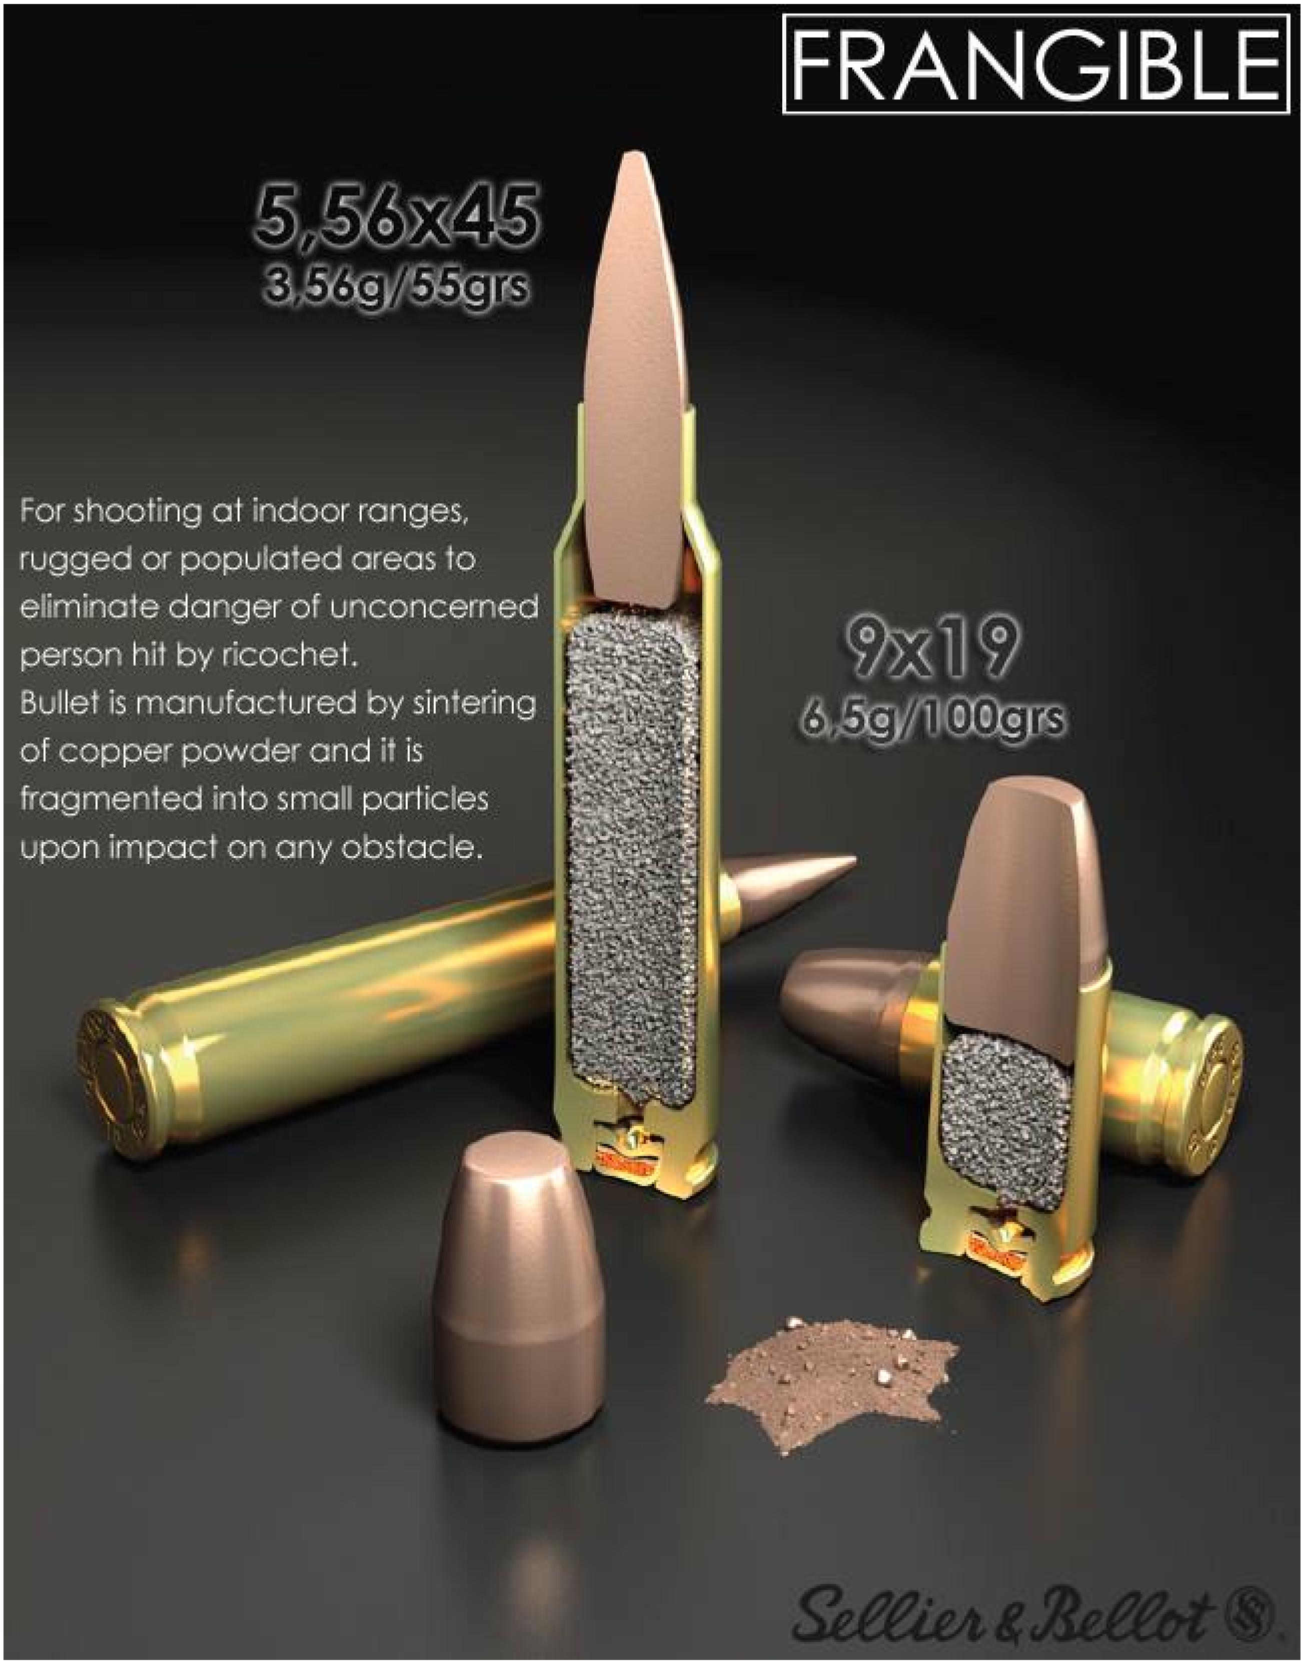
However, for pistols, frangible ammunition is the best logical option.



No slug, no striations, no evidence.



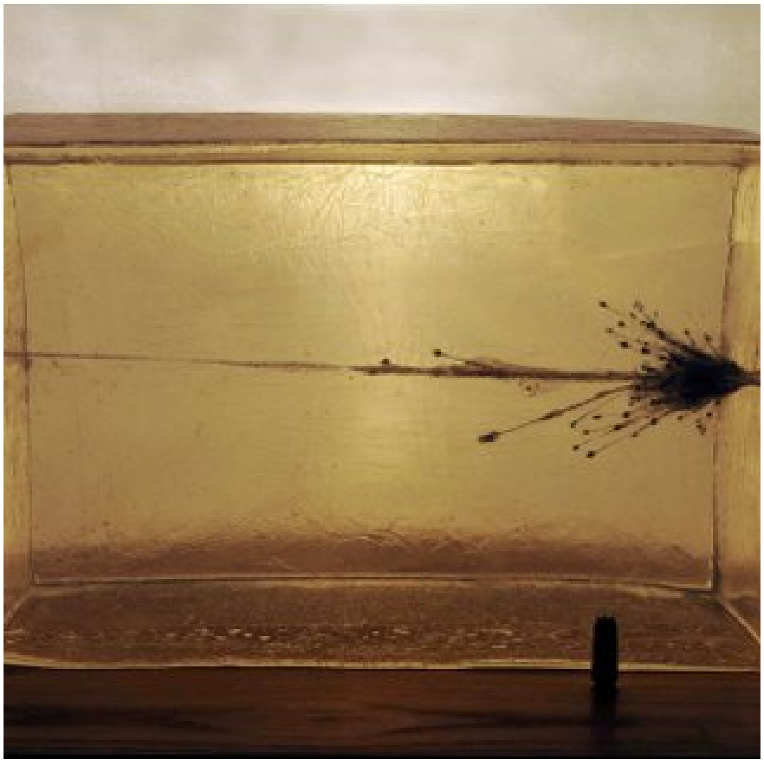
Bullet fragmentation also does more internal damage.

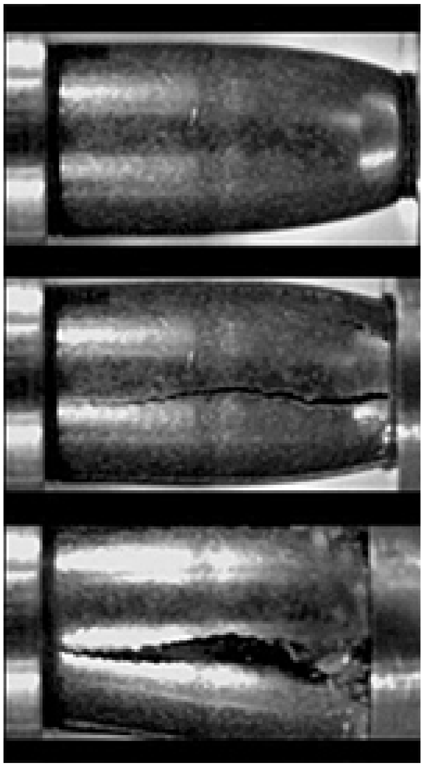


FRANGIBLE
5,56x45
3,56g/55grs
9x19
6,5g/100grs
Sellier & Bellot

For shooting at indoor ranges, rugged or populated areas to eliminate danger of unconcerned person hit by ricochet.
Bullet is manufactured by sintering of copper powder and it is fragmented into small particles upon impact on any obstacle.

Frangible ammunition is superior.





Where do I get frangible/sinterfire ammunition?

- **Sporting goods stores (send a non-felon over 21 with valid state ID)**
- **Gun stores**
- **Gun shows**
- **Online from storefronts like Natchez Shooter Supply or BUDK**
- **Get it on the street**

NOTES

- You need a cylindrical thin diamond rasp to file out the inside of old gun barrels to fuck with the rifling and the ballistics when you are ready to dispose of the barrel. Ballistics involve shooting a round out of a gun in evidence to compare the undamaged bullet to the bullet pulled from the scene of a crime. If that bullet matches their damaged slug they pulled out of someone's face or some wall of a grocery store that was robbed, you're fucked. Don't be fucked. Destroy the evidence and dispose of it.

- Always use brass catchers and use gloves at all times you are shooting.

- Always toss your scraped old barrels in a large body of water so rust and water based erosion can also occur to the old barrel.

- Always melt your shells down, cast brass ingots and sell them to some recycling plant, junkyard or on eBay.

Yeah, this shit that street niggas are too fucking dumb to consider is why you need brass catchers.

Firemen fight fires. They know all about fire. Cops enforce the law. They know all about crimes. Niggas doing drills spin the block **AND LEAVE ALL THE FUCKING EVIDENCE AND THEN MISS THE TARGET.**

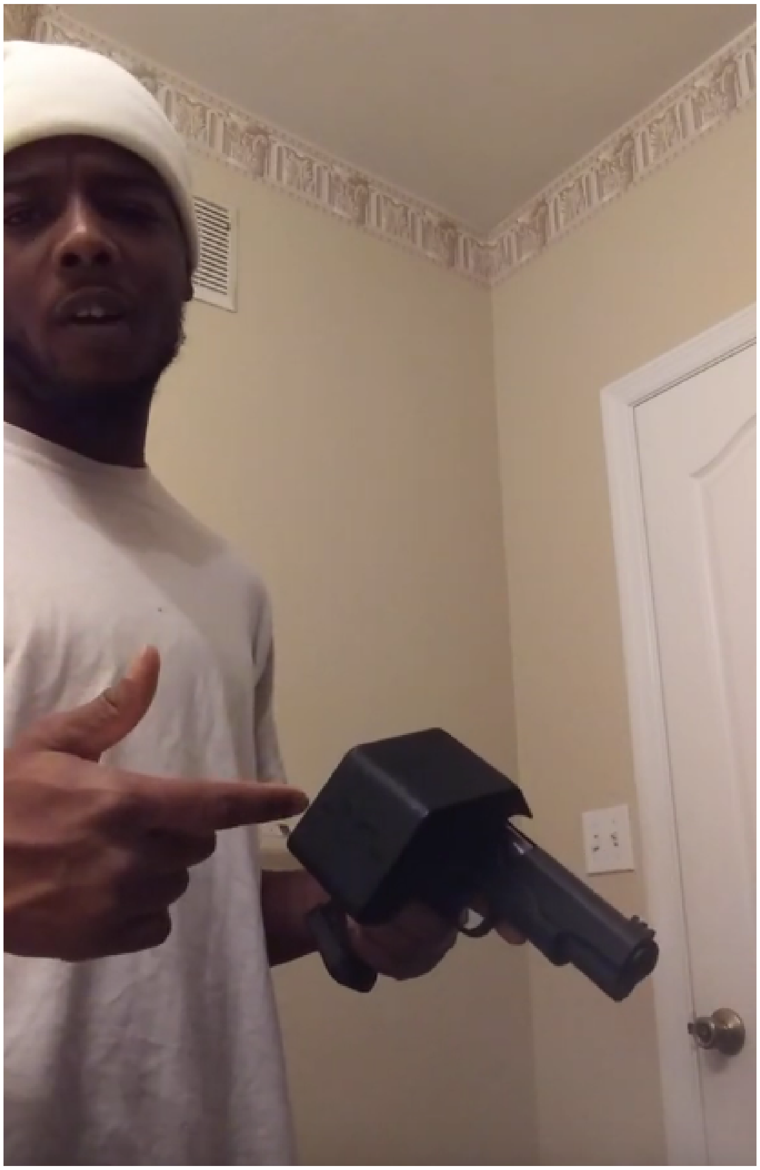
EVERY NIGGA OUT HERE NEEDS TO BE A PROFESSOR IN FORENSICS.

If you leave shells on the ground and use non-frangible ammunition, you are basically saying "fuck my life."

SMITH & WESSON
SPRINGFIELD, MA USA
SW40VE

Get a fucking brass catcher. Get guns that have brass catchers made for that model of gun.

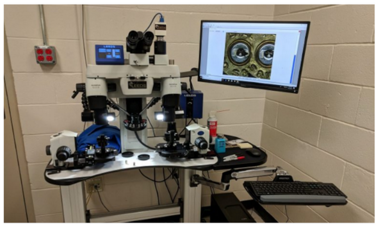
Be like FG SauceGod



If you know, you know.

But in case you don’t, let me tell you:

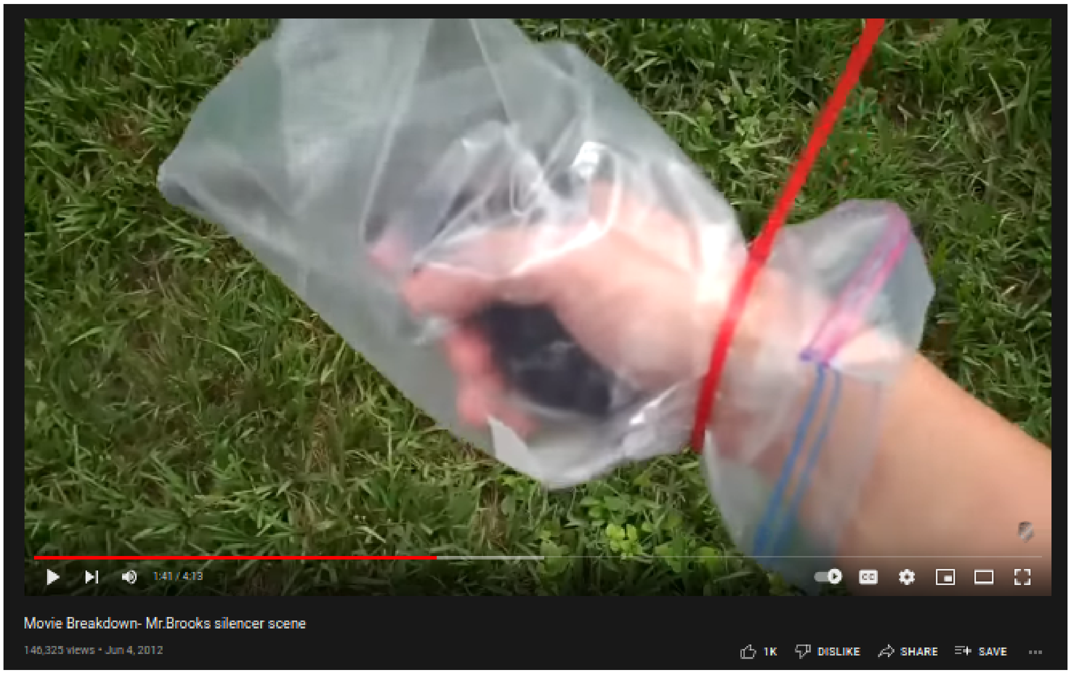
+



=

If you are down really bad, and I mean this bad, like this peach that can’t get up:

Just do like this:



Movie Breakdown- Mr.Brooks silencer scene

146,325 views • Jun 4, 2012

Use two big Hefty trash bags for Dracos and AR pistols. Put two bags on and tie those shits and blow. Your shit may jam if you do this. Also revolvers break frangible ammo. Brass catcher or Brasstrax investigation. Y’all pick one. It may look retarded as fuck but this shit pays off. Do this every single time you have to blick or pay the price of years in a place where gay niggas fuck other niggas in the bootyhole.

I don’t know about y’all niggas but being surrounded by niggas and no pussy is stupid as fuck to me. That’s why the fuck you need to be smart when you do real nigga shit.

Stay out of jail, and be drowned in pussy and hundred dollar bills.

Be like this lil nigga here. He has all the hoes. He’s covered in drip. He’s repping his set. And,

HE’S NOT IN JAIL BECAUSE HE WAS CAUGHT WITH A DIRTY GUN

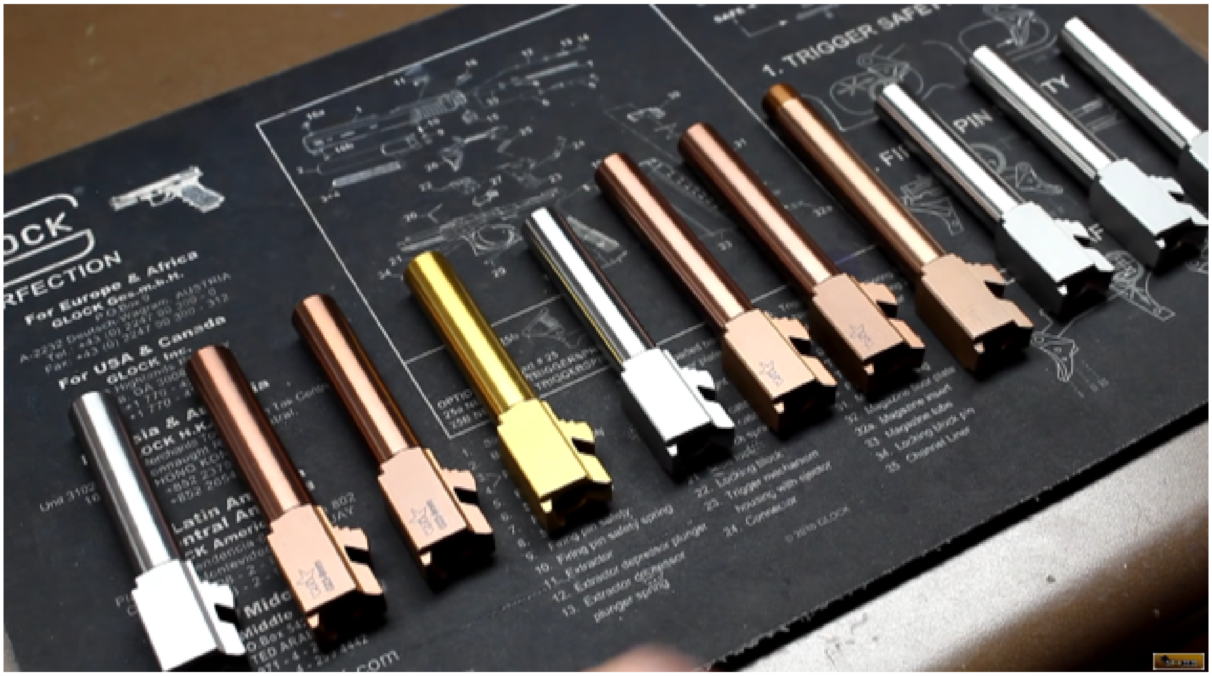
Read this book, use frangible bullets, use brass catchers, melt your shells down, file out and replace your barrels, ejectors, extractors and firing pins, toss that shit in the river, lake or if you know niggas in a steel plant a vat of hot molten steel and you can be just like him. I may not be a street nigga or know shit about drills or shooting but if I can research guns and forensics online and ask questions on 4chan, you niggas actually out here with the guns can do the same shit and move differently. Y’all can even buy or start a junkyard or metal recycling business to melt shit like brass shells down but the niggas in their feelings and the really grimy and ignorant niggas can’t be involved. The greed and envy will bring down the vision. You need Stringer Bell and Omar type niggas and not Wee Bay type niggas to be running these types of operations of the crew or the set. Not to say that workers are useless but keep workers on the street and bring the entrepreneurial, ambitious, planning and book smart niggas into the fold. Right now, the cartels are able to do this but it’s not something they think of. I’m trying to put y’all onto some game.

PLUG AND PLAY

This is a Glock barrel. You can take it out of a Glock. Wow. Impressive. Nice. Yay.

But, here is something y’all niggas didn’t know.

Every single gun barrel in existence has a unique set of microscopic striations or errors or notches when the barrel was manufactured. Each barrel in existence is unique. No two are identical. Every gun has a unique ballistic fingerprint. Change the barrel, change the gun. If you buy a Glock from the streets, replace the barrel, ejector, extractor and firing pin immediately and get a Polymer 80 frame.

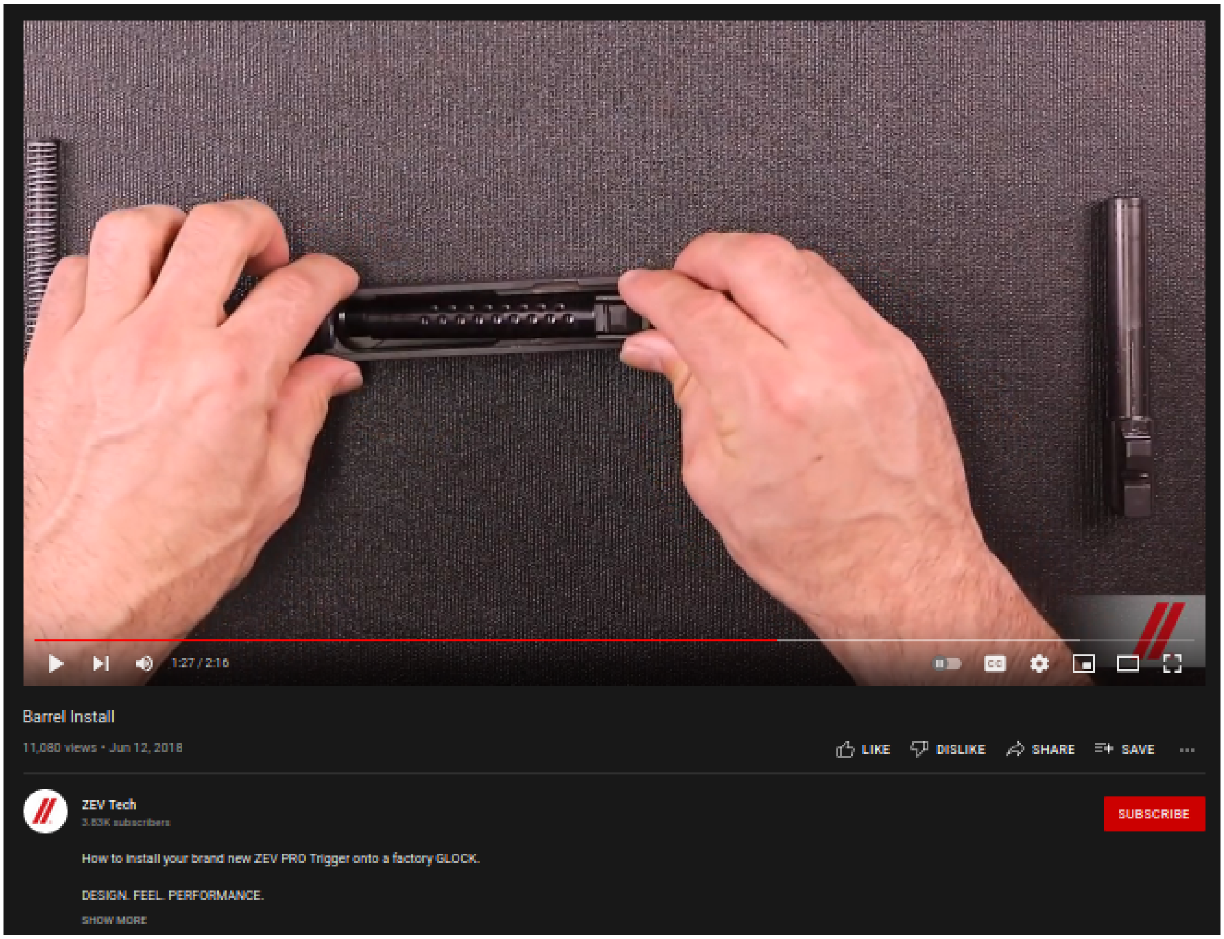


1. TRIGGER SAFE
For Europe & Africa
GLOCK Ges.m.b.H.
For USA & Canada
GLOCK Inc.

Pictured here are 11 barrels for various Glocks. Each barrel is unique. If you shot someone with that golden barrel (barrel four, left to right), took the golden barrel out, filed it out with a cylindrical (round tube) diamond file rasp like from this gunsmithing file kit:

Then threw that golden barrel (that has had the inside rifling filed, scraped and deformed to shit) in say Lake Michigan or something, when no one was looking, police would have no evidence.

From there, you could get a new clean unused barrel that has no bodies on it and put that in the gun, instead of throwing a whole fucking gun in the river or in a storm drain and wasting money, like a total fucking idiot.



Barrel Install

How to Change a Glock Ejector

15,741 views • Mar 15, 2015

Ballistic Expansion

709 subscribers

After a quick search I found little information on changing just the ejector in a glock. Here is how I do it.

Glock firing Pin Removal - Cleaning & Removing The Glock Firing Pen From Slide

91,226 views • Nov 8, 2016

Good Luck America

122K subscribers

This video shows how to remove the Glock Firing pin and extractor for cleaning or repair.

So little education seeking niggas, what do you need to do on YouTube?:

- **LEARN HOW TO CLEAN THE GUN SO IT WON'T JAM.**
- **LEARN HOW TO DISASSEMBLE THE GUN AND PUT IT BACK TOGETHER.**
- **LEARN HOW TO REPLACE THE BARRELS, EJECTORS, EXTRACTORS AND FIRING PINS SO YOU DON'T GET CAUGHT WITH A GUN AND GET YOUR GUN TESTED FOR BALLISTICS AND THEN BECOME A MURDER SUSPECT.**

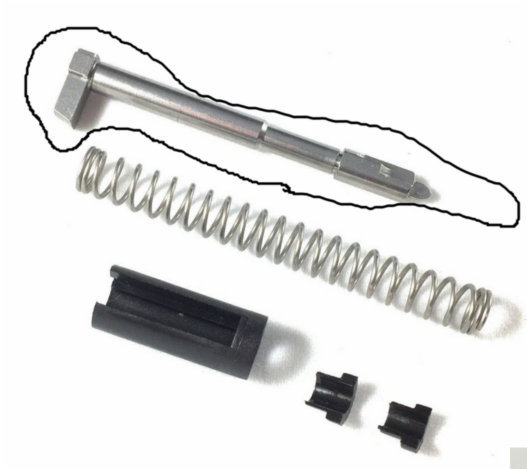
Then, what do you need to do when you get that paper right?

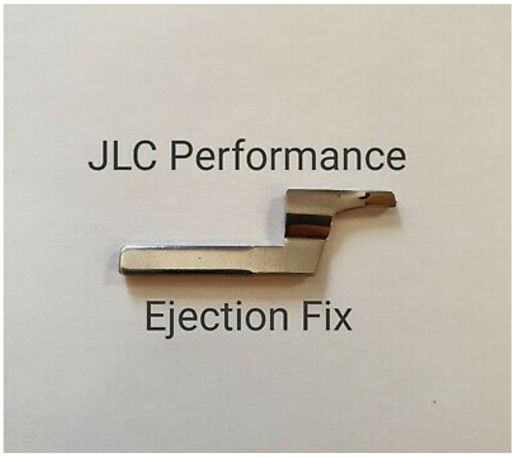
- **GET NEW BARRELS, EJECTORS, EXTRACTORS AND FIRING PINS FOR YOUR GUN'S MODEL AND VERSION.**
- **GET A GUNSMITHING FILE KIT FOR YOUR SPECIFIC GUN.**
- **GET A GUN CLEANING KIT FOR YOUR SPECIFIC GUN.**
- **GET A GUN SCREWDRIVER SET FOR TAKING YOUR SPECIFIC GUN APART.**

Then what do you need to do after, say about, four or five months of killing niggas left and right?

- **TAKE YOUR GUN APART.**
- **REPLACE THE BARREL WITH A NEW ONE, BUT FIRST TAKE THE OLD BARREL OUT.**
- **USING A CYLINDRICAL DIAMOND RASP FROM A GUNSMITHING KIT, FILE OUT THE OLD BARREL WITH THE BODIES ON IT AND DO THIS FOR LIKE FIVE MINUTES ON BOTH ENDS. WASH YOUR HANDS. PUT THE OLD BARREL SOMEWHERE AWAY FROM THE TABLE YOU'RE WORKING ON.**
- **TAKE OUT THE OLD FIRING PIN, EJECTOR AND EXTRACTOR AND PUT THEM ASIDE WITH THE OLD BARREL SOMEWHERE ELSE.**
- **CLEAN YOUR GUN.**
- **PUT THE NEW BARREL, EJECTOR, EXTRACTOR AND FIRING PIN IN.**
- **PUT YOUR GUN BACK TOGETHER.**
- **TAKE THE OLD BARREL AND TOSS IT IN A RIVER, LAKE OR OCEAN (NO PONDS) A BIG ASS MOTHERFUCKING BODY OF WATER ONLY.**

What parts need to be replaced by you niggas out here sliding?





Firing Pins, Extractors, Ejector Pins (found in trigger housings) And Barrels

SERIAL NUMBERS

All guns have serial numbers. Every gun sold from a gun show, stolen from a person who bought from a gun show or gun store or bought from a gun show or off the street has a serial number on it. The person signing all the paperwork for the gun and buying it has to go through background checks and get put on registration. Meaning, that serial number is tied to you or the nigga who bought it for you or the nigga you stole it from.

Remember what the fuck I said earlier?

“If you are caught with a dirty gun, you will pay for every crime that gun was used in, whether you did it or not. If you came into possession of a stolen gun, even if it has no bodies on it, you will go to jail for an illegally obtained firearm. A privately sold firearm would have a bill of sale or some means to prove transfer of ownership, even an Armslist correspondence. A stolen gun will have its serial on file with the police so when they catch you with it, you're getting charged. The best position for you to be in, assuming you are not a felon or someone not allowed to have a gun, is to have a clean gun. A clean gun would be a gun that is neither stolen, nor has any bodies on it. As a person allowed to own a gun, you having a clean gun is your legal right. As a felon or someone not allowed to own a firearm, your course of action is to obtain something that is not legally seen as a firearm, like crossbows, knives, bows, airguns and black-powder, nitro fire, cap-and-ball revolvers, pistols and rifles. If you want to own a gun and intend to use it for legal reasons, you will have to go through a background check, go on file with the ATF, pay taxes, give fingerprints, etc. It's not worth the hassle to be honest. A trackable smart gun, with micro-stamping, some type of RFID smart bullet and a serial number deep in every part of the gun would be a good way to make gun theft harder and make gun homicides easier to counteract. But, this will never happen and nor should it. The best gun for a person to have in any circumstance, is a ghost gun. You should never have a gun with a filed out serial number or bought off the streets. Get a Polymer80 receiver or in the case of an AR-15, a 80% lower. You want a ghost receiver (and new barrels and a new slide from Polymer80 as well) with no serials” (because if you are caught with a gun that has bodies on it, you will go to prison for Murder and if the gun is clean, you will still go to jail for having a stolen gun with a FILED OUT SERIAL NUMBER OR A SERIAL NUMBER REPORTED AS STOLEN, which is why you need A GHOST GUN)

And by the way, Polymer80 Glock slides don’t have serial numbers on them

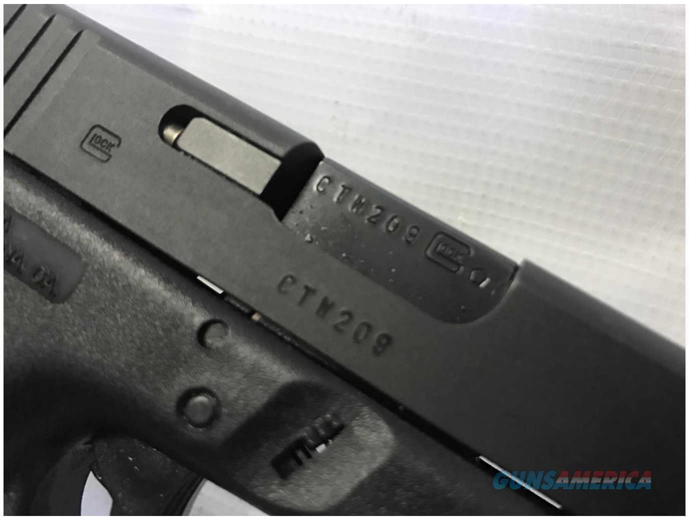
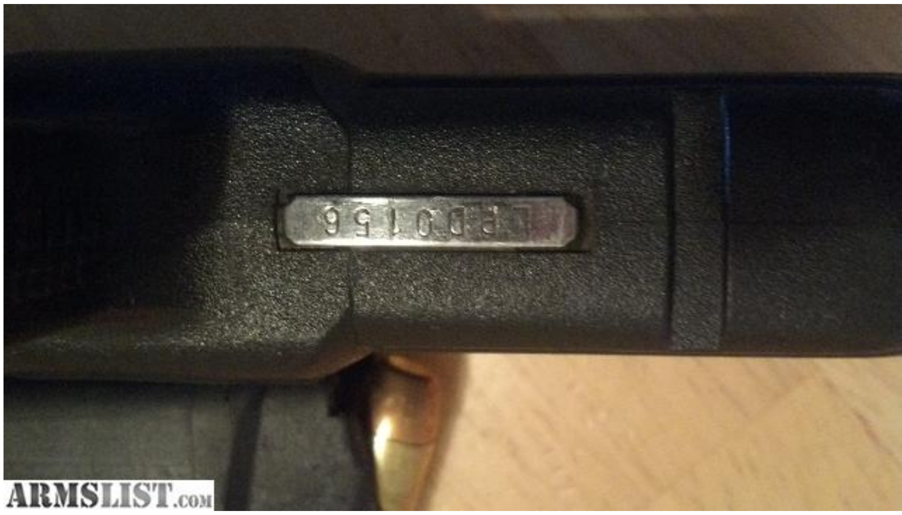
Compared to the stock factory slides, receivers and even factory Glock barrels:



GLOCK
CTW208
CTW208
GUNSAMERICA



ARMSLIST.com

Felon with dirty gun = Guilty of Murder

Felon with clean stolen gun = Gun charge

Non-felon with stolen gun = Felon

Non-felon with clean ghost gun = Legal gun owner

No serial number on a Polymer80 slide or frame

That faggot Joe Biden is currently trying to get gun laws passed to put serial numbers on these Polymer80 kits even though niggas are ignorant to this. Niggas do not make ghost guns. Fuck Joe Biden. That motherfucker needs to worry about some little senator’s daughter spitting out his nut on the Presidential podium on live TV. Old retarded, corrupt ass motherfucker.

The choice is obvious. Get a Polymer80 slide (they have no serial number) and a Polymer80 receiver (it has no serial on the underside plate at all and you will have to use a dremel (look it up), milling equipment and a drill to complete the frame) and regularly replace the barrel, ejector, extractor and firing pins. Get some spare parts and stockpile them in the crawlspace of a trap house and not your own house. Make sure it's in territory you can get too fast and that you control. If you do that, you will have no problems on drills, hits or assassinations. Or, alternatively, you can put the guns down or use the gun and then sell it on the street to another nigga who will either get caught with it or sell it to another nigga or toss the whole fucking gun in a storm drain or river or lake or harbor or pier/marina.

JANUS DIVISION GROUP

P80 POLYMER80

WGC SHOP.com

What do you do when you get a hot Glock off the street?

- **TAKE IT APART**
- **CLEAN IT**
- **PUT IT BACK TOGETHER BUT TRY TO REPLACE THE BARREL, EJECTOR, EXTRACTOR WITH NEW ONES AS FAST AS POSSIBLE AND DO IT REGULARLY, LIKE EVERY FEW MONTHS OR SO. (BE WARNED, IF YOU AREN'T MAKING SEVERAL BANDS, YOU CAN'T AFFORD TO DO THIS SHIT. THIS IS RICH MAN SHIT HERE. THIS IS STAY OUT OF JAIL SHIT. IF YOUR FREEDOM IS WORTH A FEW BANDS, YOU WILL PAY IT.)**
- **WHEN YOU HAVE YOUR BREAD RIGHT, GET A POLYMER80 SLIDE AND RECEIVER WITH NO SERIAL NUMBERS ON IT.**
- **COMPLETE THE 80% POLYMER80 RECEIVER AND TAKE ALL THE PARTS FROM THE GLOCK AND PUT THEM IN THE POLYMER80 RECEIVER.**
- **TAKE ALL THE PARTS FROM THE SLIDE AND PUT THEM IN THE POLYMER80 SLIDE WITH NO SERIAL NUMBER ON IT.**
- **SIT BACK AND RELAX BECAUSE NOW YOU HAVE A GHOST GUN WITH NO SERIAL NUMBER ON THE SLIDE OR THE FRAME (THE RECEIVER, THE PART OF THE GUN YOU HOLD) AND YOU KNOW HOW TO REPLACE THE FOUR KEY PARTS THAT ARE IMPORTANT TO FORENSIC INVESTIGATORS. (THE BARREL, THE EJECTOR, EXTRACTOR AND FIRING PIN.)**

Why is the barrel so important?

- **It leaves striations on bullets.**
- **It can be used to identify a gun.**

Why is the ejector, extractor and firing pin so important?

- **It leaves primer strikes.**
- **It leaves extraction markings on the casings.**
- **It leaves ejection marking on the casings.**

Why is the casing so important?

- **It can be matched to a specific gun's ejector and extractor.**
- **It can be matched to a specific gun' firing pin.**
- **It is evidence.**

MELT YOUR SHELLS

So, you have a brass catcher full of shells. Now what? I'm glad you asked.

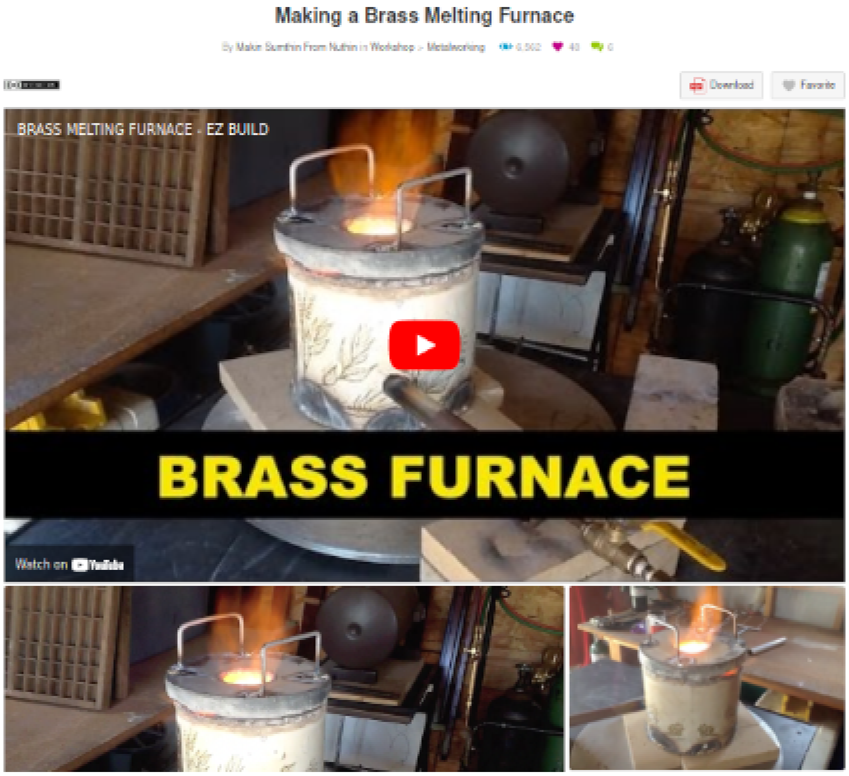
You need to melt these shells down in a foundry.

This kind of foundry. But you know niggas don't have shit like this laying around and are not connected like this. A cartel in Mexico may just be plugged like this to make Mexican steel mills or brass factories melt down steel gun parts into molten steel or brass shells into molten brass. Luckily for you niggas, there is a way around this.

If you are intelligent (most hood niggas aren’t, DON’T GET MAD AT ME) then you can make your own foundry or buy one if you are not able to know what the fuck you are doing.

A lot of niggas are smart and clever as hell. I’d say 50% of niggas are smart as hell but just were a victim of their circumstances. 30% of these niggas just like jail, you can’t tell them shit and it’s young niggas most of the time. 20% of niggas are just sociopathic, psychopathic and don’t want to hear shit for their benefit, furthermore, they won’t. They can’t even respect the old heads or an O.G.

But anyway, the foundry:



Making a Brass Melting Furnace

By Makin Sumthin From Nuthin in Workshop > Metalworking

Mexicans love to work hard and they believe in that Raza shit hard as hell. Hard work is a characteristic of their shit. I could see them making foundries at home with Plaster of Paris and shit from Home Depot, flat out. Niggas would be lost as fuck and probably just throw shells in the lake or river too. Just buy a furnace if you are quick to give up or are unwilling to learn and progress, even in street nigga activity.

You will have to do your own research, watch YouTube videos on melting brass in a home furnace, fuck with a lot of jewelry makers, welders, old heads, smart niggas in your hood and put them on and also fuck with the O.G.s heavily. Niggas who would have had experience in a trade like metallurgy and blacksmithing. This goes for everyone, Black, White, Mixed, Hispanic, Asian, a fucking alien that crashlanded and somehow got ahold of this book and is struggling to even read this fucking shit right now.

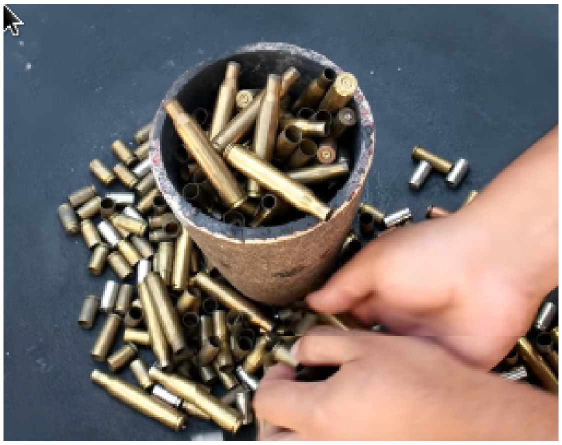
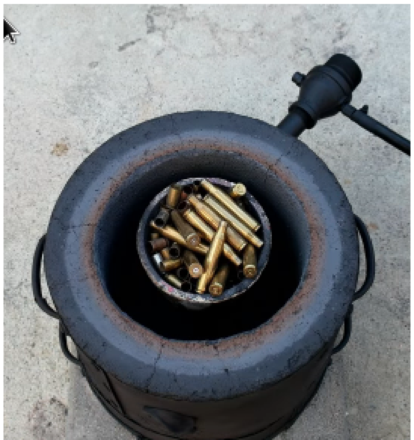
You need this kind of foundry, the tong thing that allows you to remove the crucible (the pot of liquid metal), the heat resistant gloves and propane, as well as other equipment. If you are impatient, ignorant, unwilling to learn, I promise you will die of third degree metal burns. Fast.

This is not shit for a stupid motherfucker so if you have intelligent niggas in the set, you need to let them shine and put ego or appearance aside. If a nigga knows more than you, you do not need to pull out a gun and shoot him because he will upstage you or whatever the fuck, put that man on and let him rise through the ranks and elevate the set. And if you are high or stupid during any part of this process, you will die painfully from molten brass.

So, here is a really shortened visual representation of the process:



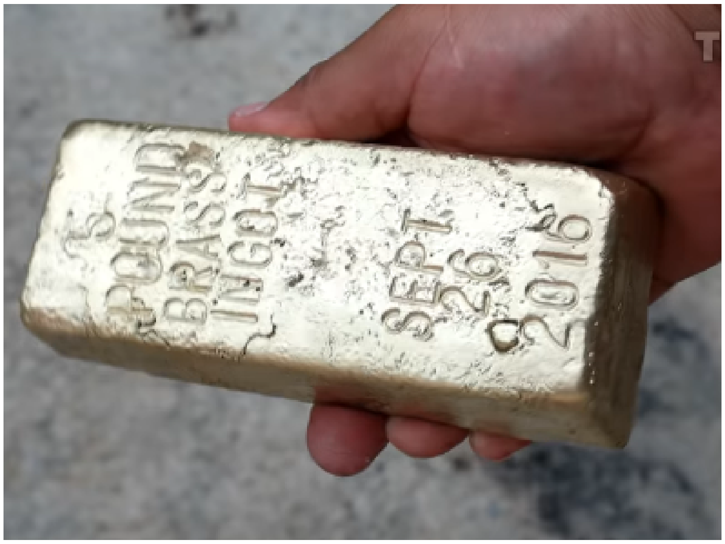


TITO4RE

Too hot to touch with your hands. Leave it in for hours.

A buffer for polishing the ingot.

Hammer stencils, hit this on the bar, the letter goes into the bar and you can write on it.



Like this. You can make this say BD, GD, 2-4, 360, 7-4, 300, 600, Latin Kings, 4CH, BLOODS, CRIPS, ARYAN BROTHERHOOD, MS-13, NORTENO, Growth And Development (if you turn it long ways), anything you want it to, furthermore, you can sell these or just take the bar to a recycling plant without putting any fucking words on it and sell it as scrap metal. The set could even buy a scrap metal business or start one via affiliates who are not involved in the street day to day activities and employ niggas in their hood, like the O.G.s. from back in the 1960s and 1970s would have done.

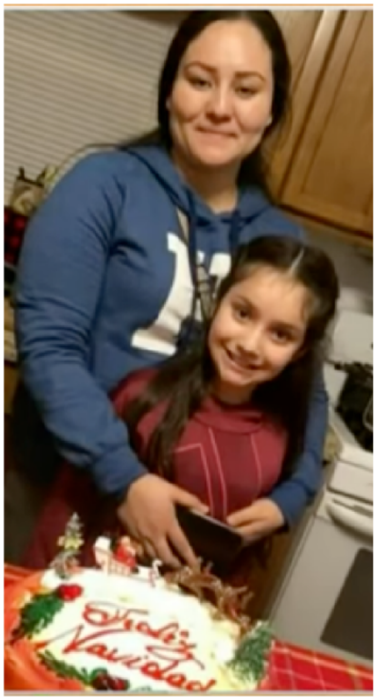
PILLS AND DRILLS DO NOT GO TOGETHER

You ever see those heavy machinery warnings?

DON'T OPERATE HEAVY MACHINERY... LIKE YOUR CAR.
KEEP OUT OF REACH OF CHILDREN
MEDICATION MAY CAUSE DROWSINESS OR DIZZINESS
DO NOT OPERATE HEAVY MACHINERY
NHTSA

If you are high, you will likely mix niggas up and kill the wrong nigga.

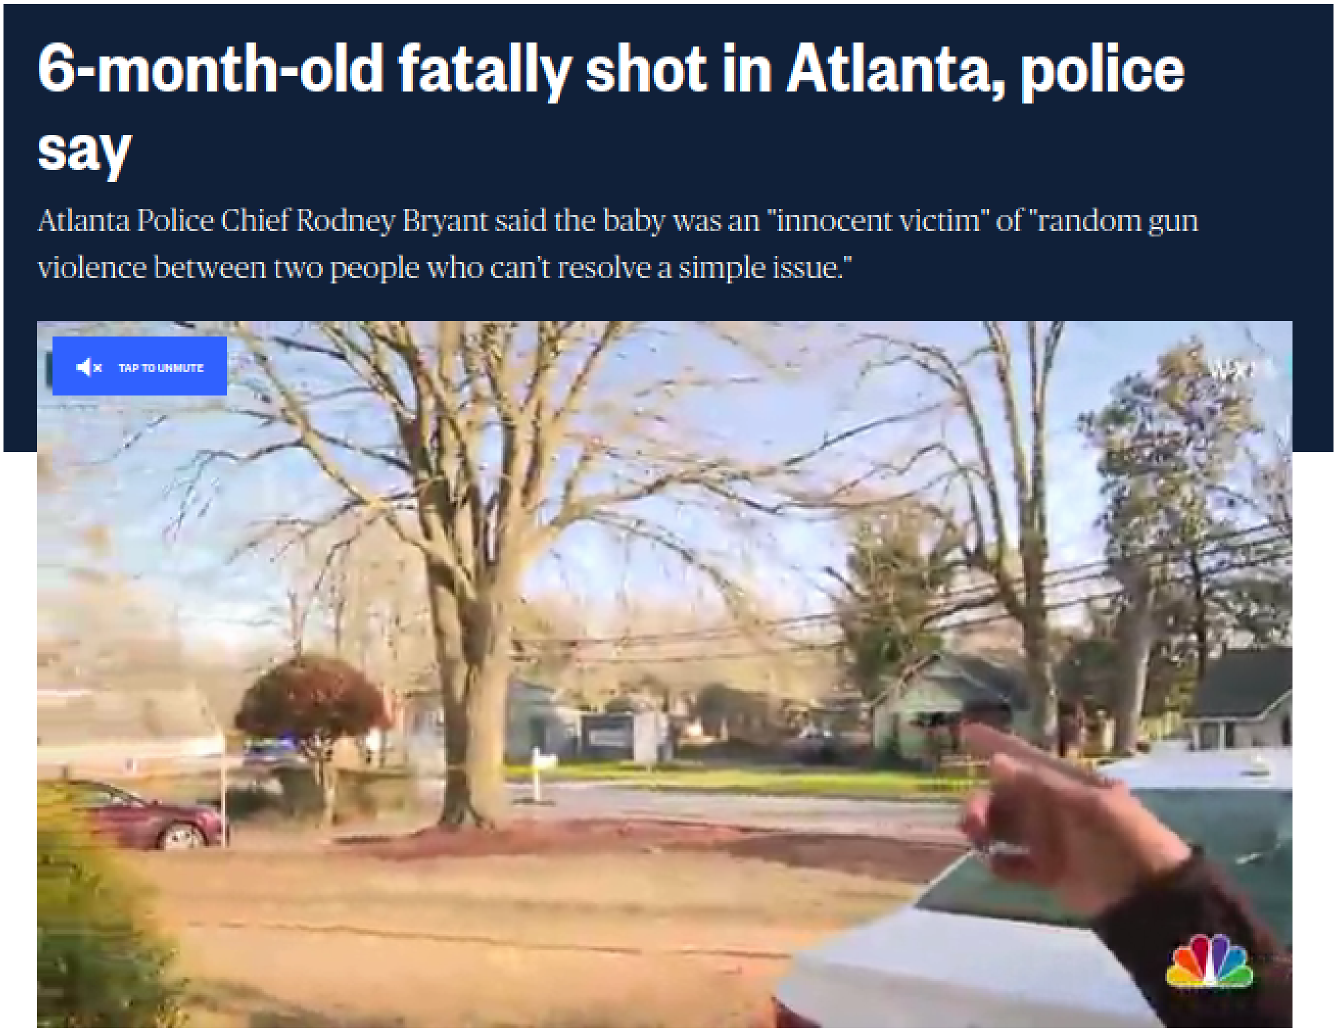
Furthermore, you will miss and kill innocent girls like this:



Feliz Navidad

Whoever the fuck killed this girl is no earthly good and I hope they get raped in jail and get shanked to death. How the fuck do you kill a baby coming home from school who wanted to be shit and do something with their life? There is doing dirt and then there is this grimy ass lascivious ass shit here. You ain't shit so you have to go kill someone innocent and make sure they ain't shit either? What the fuck is that shit? Fuck outta here. R.I.P.

Put the pills down. Stop driving at fucking 50mph while shooting at a nigga. If you are going to shoot at a nigga, be on a bicycle, do a walk up, learn to aim or stop the fucking car or drive slow and shoot the nigga.



6-month-old fatally shot in Atlanta, police say

Atlanta Police Chief Rodney Bryant said the baby was an "innocent victim" of "random gun violence between two people who can't resolve a simple issue."

TAP TO UNMUTE

Back in the day, the gang leaders and the streets would make niggas who did this turn themselves in or they would be taken out by the gang. It used to be a violation, nationwide, in every single gang. Society needs to get back to that.

What do you do during after a drill?

- **Get a Polymer80 slide and receiver (You only need to do this once and you don’t have to replace these ever, you just need shit with no serial numbers on it so you have a ghost gun.)**
- **Stop the car or drive slowly.**
- **LEAVE YOUR CELLPHONE, IPOD AND SMARTWATCH AT HOME. EVEN YOUR AIRPODS (THEY USE BLUETOOTH).**
- **Be sober during the drill.**
- **Dox the target.**
- **Figure out where the target actually lives.**
- **Do recon and look for the opps.**
- **Have gloves on.**
- **Have brass catchers.**
- **Use frangible ammunition ONLY.**
- **Learn to aim.**
- **Kill the person you’re aiming at.**
- **Stop shooting babies in the face.**
- **Stop hitting some old women with stray bullets.**
- **Never become rappers.**
- **Stay the fuck off social media.**
- **Shut the fuck up.**
- **Shower.**
- **Wash your clothes.**
- **Clean your gun.**
- **Put your shells in a bag and later melt them in a propane furnace.**
- **After some point in time (after a few drills), replace your barrel, ejector, extractor and firing pins. Do this regularly.**

- **Avoid switches, sticks and driving. If you will have a stick, you can't pull your shit out fast enough. If you have a switch, you will burn through the clip and miss the target. If you drive, while shooting, it stands to reason you will fucking miss the target.**

Don't be like these stupid ass niggas who shot 6 people and only 1 died.

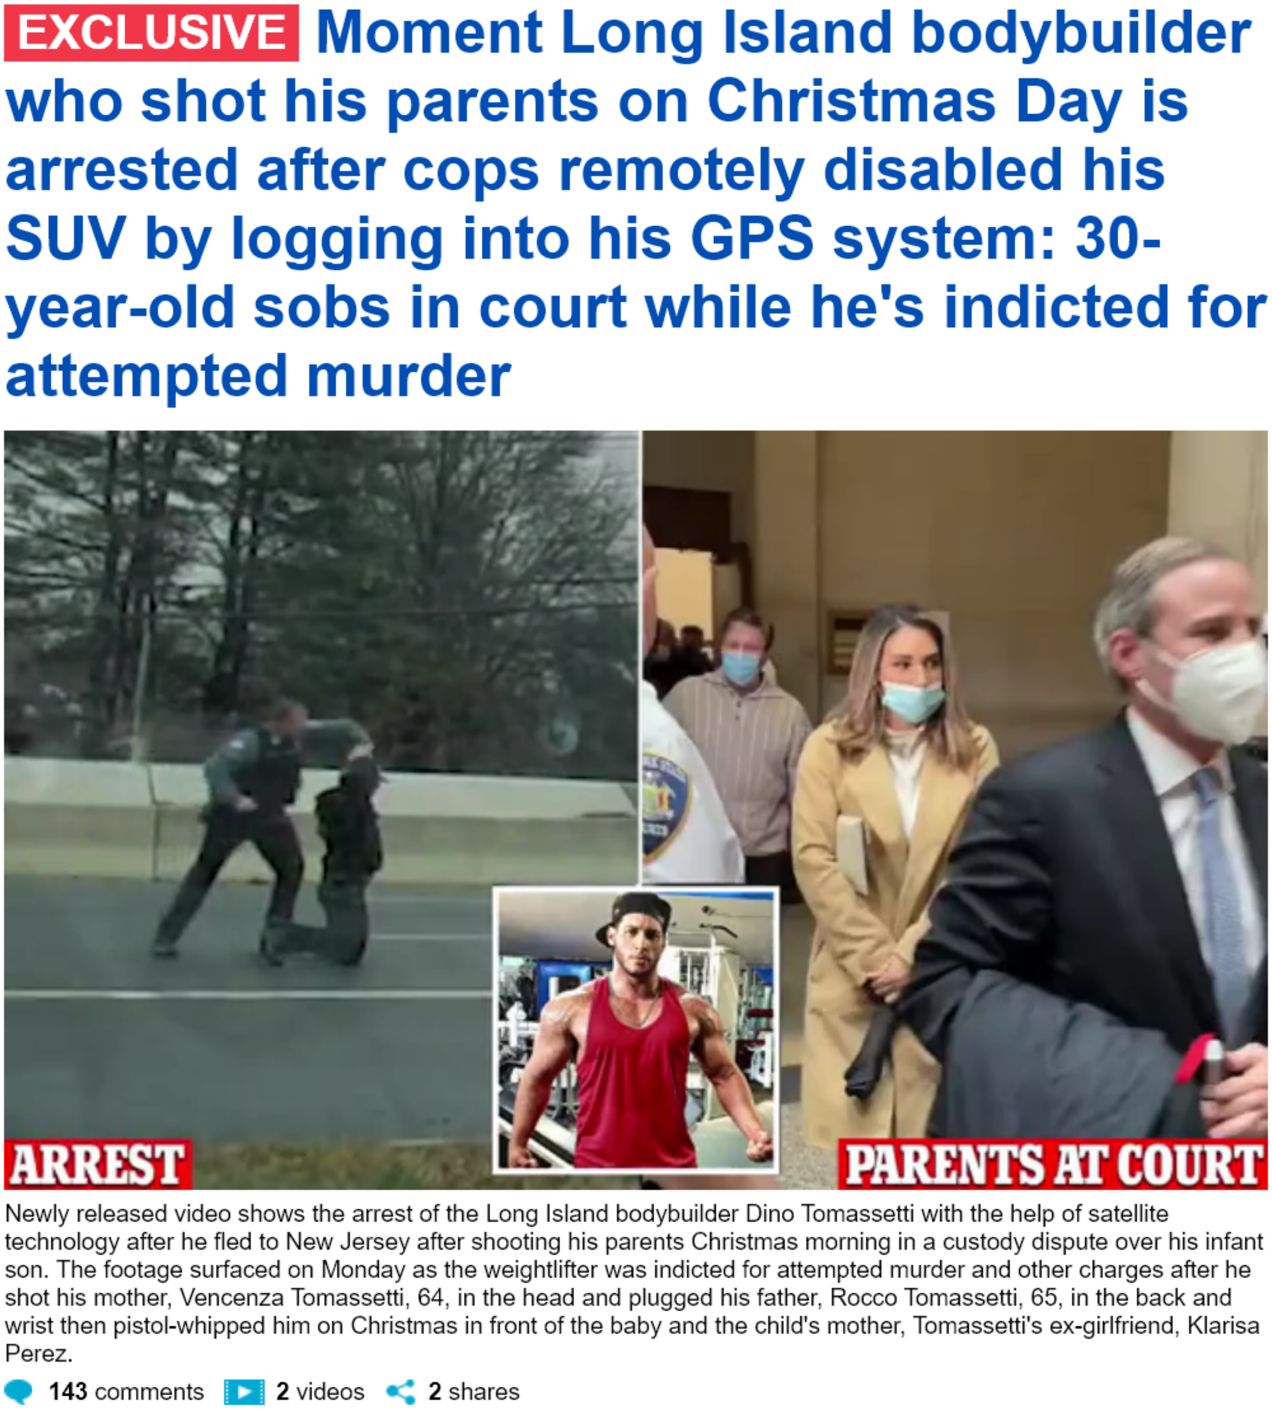
It is most intelligent to do a drill on a bike. Why?

- **You don't have trouble hiding a bike, whereas you can not hide a car, no matter how smart you are. You do a drill in a car, someone will see it eventually. You can hide a bike in your house. You can destroy and get rid of a bike faster.**
- **You don't have to worry about OnStar shutting your bike off in a chase like cars.**
- **You can get into alleys and maneuver into areas too slim for cars to speed through.**
- **You control the speed and the direction of a bike more so than a big ass car.**
- **You can aim better.**
- **The man, covered head to toe, in a black hoodie, on a bike could be anybody. The nigga in the white car, with tinted windows, golden 24 inch rims, the custom license plate and blue headlights could be you.**

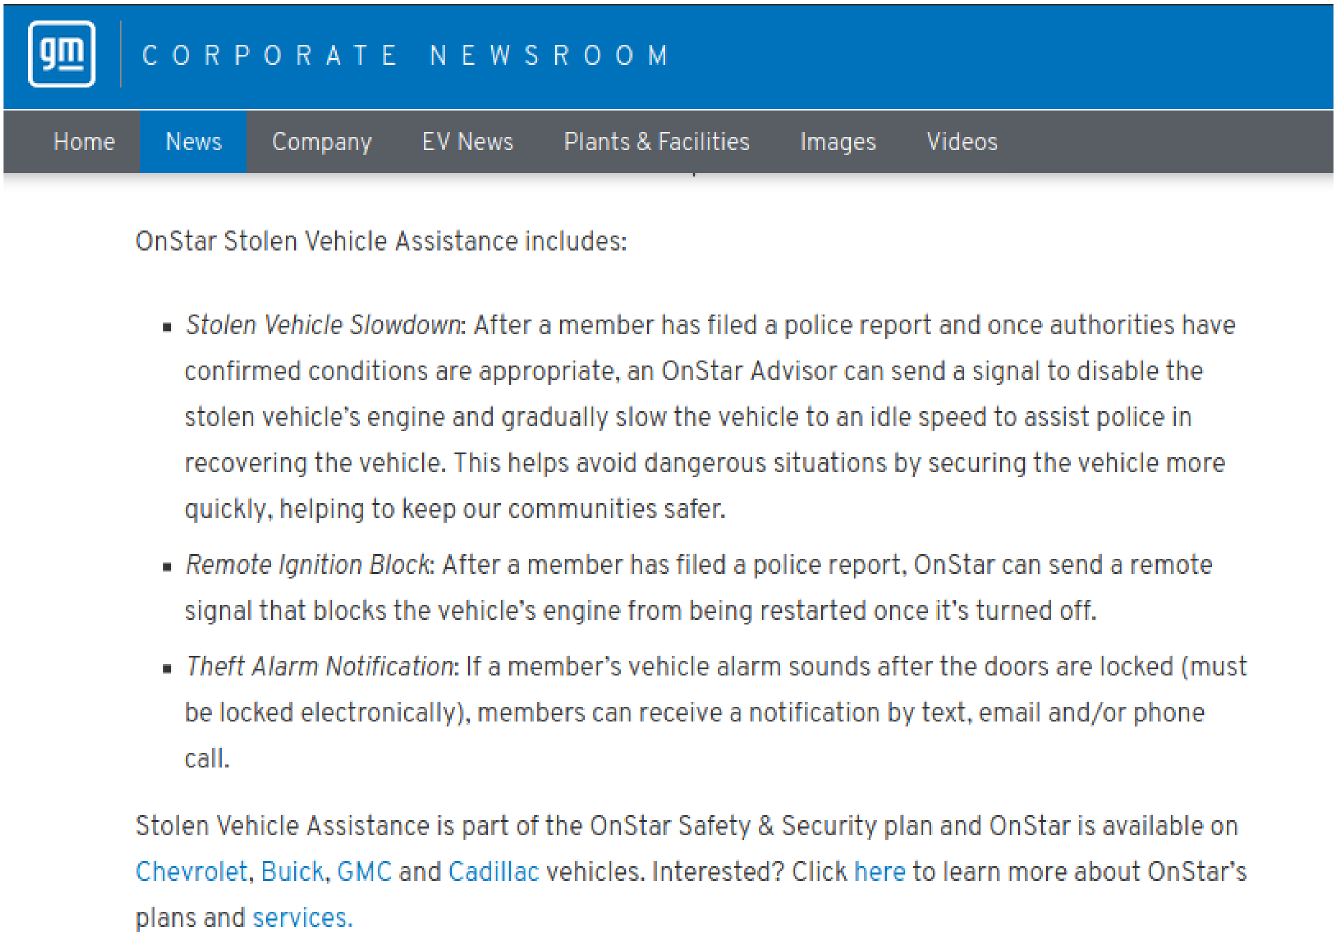
Lastly, if you do a drill, what kind of car should you drive?

NOTHING WITH A DIGITAL DASH, ONSTAR OR GPS



EXCLUSIVE Moment Long Island bodybuilder who shot his parents on Christmas Day is arrested after cops remotely disabled his SUV by logging into his GPS system: 30-year-old sobs in court while he's indicted for attempted murder

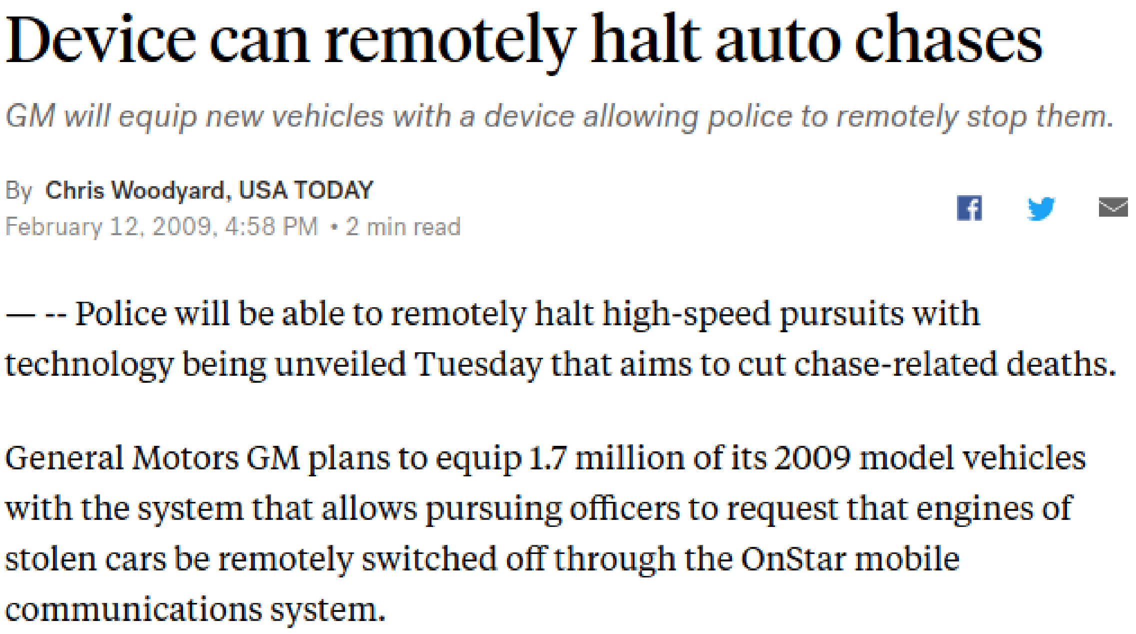
Newly released video shows the arrest of the Long Island bodybuilder Dino Tomassetti with the help of satellite technology after he fled to New Jersey after shooting his parents Christmas morning in a custody dispute over his infant son. The footage surfaced on Monday as the weightlifter was indicted for attempted murder and other charges after he shot his mother, Vencenza Tomassetti, 64, in the head and plugged his father, Rocco Tomassetti, 65, in the back and wrist then pistol-whipped him on Christmas in front of the baby and the child's mother, Tomassetti's ex-girlfriend, Klarisa Perez.



OnStar Stolen Vehicle Assistance includes:

- *Stolen Vehicle Slowdown*: After a member has filed a police report and once authorities have confirmed conditions are appropriate, an OnStar Advisor can send a signal to disable the stolen vehicle's engine and gradually slow the vehicle to an idle speed to assist police in recovering the vehicle. This helps avoid dangerous situations by securing the vehicle more quickly, helping to keep our communities safer.
- *Remote Ignition Block*: After a member has filed a police report, OnStar can send a remote signal that blocks the vehicle's engine from being restarted once it's turned off.
- *Theft Alarm Notification*: If a member's vehicle alarm sounds after the doors are locked (must be locked electronically), members can receive a notification by text, email and/or phone call.

Stolen Vehicle Assistance is part of the OnStar Safety & Security plan and OnStar is available on Chevrolet, Buick, GMC and Cadillac vehicles. Interested? Click here to learn more about OnStar's plans and services.



Device can remotely halt auto chases

GM will equip new vehicles with a device allowing police to remotely stop them.

By **Chris Woodyard, USA TODAY**
February 12, 2009, 4:58 PM • 2 min read

— -- Police will be able to remotely halt high-speed pursuits with technology being unveiled Tuesday that aims to cut chase-related deaths.

General Motors GM plans to equip 1.7 million of its 2009 model vehicles with the system that allows pursuing officers to request that engines of stolen cars be remotely switched off through the OnStar mobile communications system.

CLOSING NOTES

Well, that’s all. Go out there and spin the block. I wish you success and I hope you can get to real growth and development. Build hospitals, schools, own car washes, convenience stores, restaurants, gas stations. Protect your women, protect your youth, defend your community. Do blood drives. Do canned good drives. Open thrift stores. Get back to what the gangs of the 1960s and 1970s were intended for. I hope you will be successful in eliminating your opposition and expanding your territory. One clique, one nation. Become a reasonable alternative to the failed system that continues to let your people down. Reclaim your destiny. Let the chips fall where they may and may this problem of conflicts within the hoods across America sort itself out in a way where the weak and ignorant fall and the strong, tactful and intelligent rise. If you are reading this book, you are that one nigga in 10,000. Get a Polymer80 slide and frame with no serial, regularly replace your barrel, ejector, extractor and firing pin, melt your shells into brass ingots, recycle them as scrap metal, sell them on eBay or open a junkyard business and buy/sell scrap metal.

Collect any and all brass casings. No shell left behind. Always use brass catchers or revolvers. ShotSpotter is in a lot of places and will detect suppressed shots. Suppressed shots are as loud as a plane in the air. The best time to shoot is July 4th when ShotSpotter is strained by fireworks. The second best time to shoot is 11:59pm, December 31st. New Years Eve. Several people will be shooting so this is good aural cover. Use shotguns, due to lack of ballistics. Use subsonic ammunition in a suppressed gun for minimal report. Use Frangible ammunition always if you can. No slug, no ballistics. 9mm is the best caliber for this. Replace your barrels, your ejectors, extractors and firing pins. Ballistics can trace a non-frangible bullet to your barrel through bullet striations and ejector/extractor markings on the casing, as well as the primer strike. Buy a bunch of bunch of barrels. Buy a diamond rasp file. Use it to file out barrels used in shootings. With the rasp, scrape the shit out of the inside of the used barrel. This will further fuck with the ballistics of the gun, making a match harder. One night, without taking any electronic devices, toss your scraped barrel into a river. If you fire a gun, go shower once you can to clean off nitrates and wash your clothes also. Get a black colored gun like a Glock. Silver and custom colors shine at night. Get a lightweight polymer gun. So, Glock, Kel-Tec etc. Glocks have shit like Polymer80 parts and many companies make Glock barrels. You can even get those shits on eBay. Do not bring ANY electronic devices smarter than a Casio wristwatch because smart watches, Fitbits, smartphones can all be traced. Do not bring anything with

GPS, Bluetooth or Wifi. Do not drive any fucking smart cars with OnStar or SiriusXM. Get an old ass vehicle. They can and will track you and with OnStar, they can turn your car off in a high speed chase. ATVs, old vehicles, bikes only. Have no witness or accomplice. Never bring someone else in on your work unless y'all are in a crew. If you have opps and are going after opps, do not brag after popping them and do not beef with them on social media. And CLEAN YOUR FUCKING GUNS SO THEY DON'T JAM.
